Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions. Download the latest version from <u>www.chauvetprofessional.com</u>.

Document Revision

This Ovation F-55FC User Manual is the 7th edition of this document. Go to <u>www.chauvetprofessional.com</u> for the latest version.

1. Before You Begin

What Is Included

- Ovation F-55FC
 - Gel frame

Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate customer's claim. In addition, keep the box and contents for inspection. For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Manual Conventions

Convention	Meaning	
1–512	A range of values	
50/60	60 A set of values of which only one can be chosen	
<set></set>	A button on the product's control panel	
Settings	A product function or a menu option	

Symbols

Symbol	Meaning
	Electrical warning. Not following these instructions may cause electrical damage to the product, accessories, or the user.
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
i	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

The term "DMX" used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

FCC Compliance

This device complies with Part 15 Part B of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Do not touch the product's housing when operating because it may be very hot.

Mounting and Rigging

- Do not operate this product outdoors or in any location where dust, excessive heat, water, or humidity may affect it (IP20).
- Do not leave any flammable material within 50 cm of this product while operating or connected to power.
- CAUTION: When transferring product from extreme temperature environments, (e.g., cold truck to warm, humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- When hanging this product, always secure to a fastening device using a safety cable.
- Use only the hanging/mounting bracket to carry this product.

Power and Wiring

- Always ensure that the product is connected to proper voltage in accordance with the specifications in this manual or on the product's specification label.
- Never connect the product to a dimmer pack or rheostat.
- Never disconnect this product by pulling or tugging on the power cable.

Operation

- Do not operate this product if there is damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate the product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- In the event of a serious operation problem, stop using this product immediately!

If your Chauvet product requires service, contact Chauvet Technical Support.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

2. Introduction

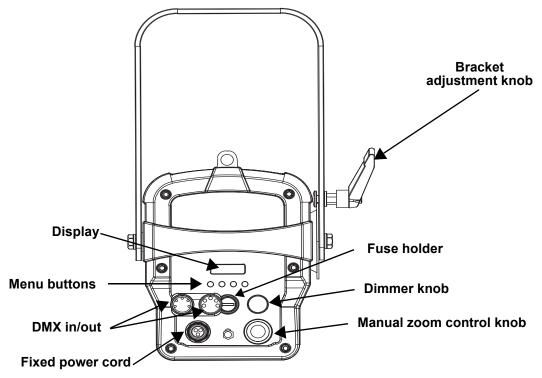

Description

The Ovation F-55FC is a full-color RGBAL inkie Fresnel-style fixture. The virtual color wheel and color temperature presets are shared from Chauvet's other full-color Ovation fixtures. A manual zoom with a 32° to 87° field angle allows the product to have a soft field of light when needed.

Features

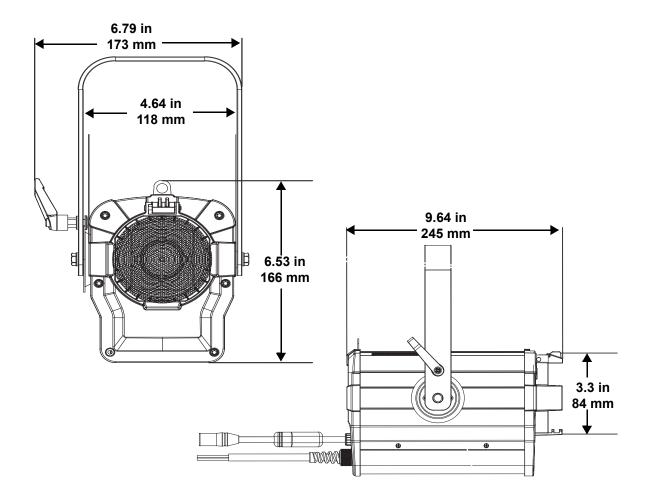

- Operating modes:
 - 1-channel: dimmer
 - 3-channel: dimmer, virtual color wheel, color temperature
 - 5-channel: RGBAL
 - 7-channel: dimmer, RGBAL, strobe
 - 10-channel: 16-bit dimmer, RGBAL, virtual color wheel, color temperature, strobe
 - 12-channel: dimmer, RGBAL, virtual color wheel, color temperature, strobe, auto program, auto speed, control
 - 13-channel: dimmer, 16-bit RGBAL, 16-bit dimmer, strobe
 - 16-channel: 16-bit dimmer, 16-bit RGBAL, virtual color wheel, color temperature, strobe, control
 - HSV: hue, saturation, value
- Compact, full-color Fresnel for tight spaces and on-location lighting
- Soft and even field of light
- 16-bit dimming resolution for smooth fades
- Virtually silent operation for use in any situation
- Manually controlled variable zoom range between 18° and 87°

Product Overview

Product Dimensions

3. Setup

AC Power

Each Ovation F-55FC has an auto-ranging power supply that works with an input voltage range of 100 to 240 VAC, 50/60 Hz. To determine the power requirements for each Ovation F-55FC, refer to the label affixed to the product or to the <u>Technical Specifications</u> chart in this manual.

The listed current rating indicates the maximum current draw during normal operation. For more information, download Sizing Circuit Breakers from the Chauvet website: www.chauvetprofessional.com.

- Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Fuse Replacement

- 1. Disconnect this product from the power outlet.
- 2. Using a flathead screwdriver, unscrew the fuse holder cap from the housing.
- 3. Remove the blown fuse and replace with another fuse of the same type and rating (T 1 A, 250 V).
- 4. Screw the fuse holder cap back in place and reconnect power.

Make sure to disconnect the product's power cord before replacing a blown fuse. Always replace the blown fuse with another of the same type and rating.

DMX Linking

The Ovation F-55FC can be linked to a DMX controller using a 5-pin DMX connection. If using other DMXcompatible products with this product, it is possible to control each individually with a single DMX controller.

DMX Personalities

The Ovation F-55FC uses a 5-pin DMX data connection for the **1Ch**, **3Ch**, **5Ch**, **7Ch**, **10Ch**, **12Ch**, **13Ch**, **16Ch**, and **HSV** DMX personalities.

- Refer to the <u>Introduction</u> for a brief description of each DMX personality.
- Refer to the <u>Operation</u> chapter to learn how to configure the Ovation F-55FC to work in these
 personalities.
- The <u>DMX Values</u> section provides detailed information regarding the DMX personalities.

For information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: <u>www.chauvetprofessional.com</u>.

Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Ovation F-55FC supports RDM protocol that allows feedback to make changes to menu map options.

Master/Slave Connectivity

The Master/Slave mode allows an Ovation F-55FC (the master) to control one or more Ovation F-55FC products (the slaves) without a DMX controller. One Ovation F-55FC becomes the master when running an auto or custom program, or by being in a Static mode.

Each slave's control panel must be configured to operate in Slave mode. During Master/Slave operation, the slaves will operate in unison with the master.

DO NOT connect a DMX controller to products operating in Master/Slave mode. The DMX controller signals may interfere with the signals from the master.

- The <u>Operation</u> section of this manual provides detailed instructions on how to configure the master and slaves.
- For more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX primer from the Chauvet website: www.chauvetprofessional.com.

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the <u>Safety Notes</u>. For CHAUVET Professional line of mounting clamps, go to: <u>http://trusst.com/products/</u>.

Orientation

Always mount this product in a safe position, ensuring that there is adequate room for ventilation, configuration, and maintenance.

Rigging

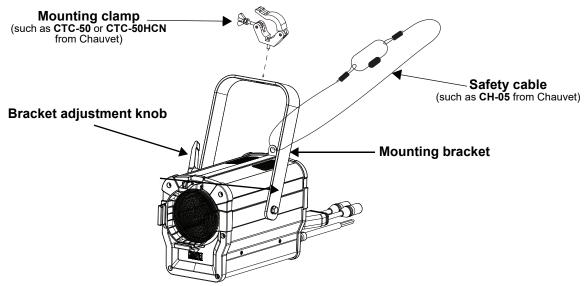

Chauvet recommends using the following general guidelines when mounting this product:

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which the product will be mounted can support the product's weight. See the <u>Technical Specifications</u> for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power-linking cables to reach.
- The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

Procedure

The Ovation F-55FC comes with a double-bracketed yoke that can be used as a floor stand or to which mounting clamps can be attached for hanging. Mounting clamps must be purchased separately. Ensure that the clamps can support the weight of this product. Use at least one mounting point per product where necessary.

Mounting Diagram

4. Operation

Control Panel Operation

Button	Function
<menu></menu>	Exits from the current menu or function
<enter></enter>	Enables the currently displayed menu or sets the currently selected value in to the current function
<up></up>	Navigates upward through the menu list or increases the numeric value when in a function
<down></down>	Navigates downward through the menu list or decreases the numeric value when in a function

Control Options

Set the Ovation F-55FC starting address in the 001-512 DMX range.

Programming

Refer to the <u>Menu Map</u> to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the desired main level, press **<MENU>** repeatedly until the option shows on the display. Press **<ENTER>** to select. This will show the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until the option shows on the display. Press <ENTER> to select. This will show either the first option if there is another programming level, or the selected value.
- Press **<MENU>** repeatedly to exit to the previous main level.

Configuration (DMX)

Use DMX configurations to operate the product with a DMX controller.

DMX Personalities

This setting allows the user to choose a particular DMX personality.

- 1. Go to the DMX Channel main level.
- 2. Select the desired personality (1Ch, 3Ch, 5Ch, 7Ch, 10Ch, 12Ch, 13Ch, 16Ch, and HSV).

- See the <u>Starting Address</u> section for the highest starting address suggested for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

In this mode, each product will respond to a unique starting address from the DMX controller. All products with the same starting address will respond in unison.

- 1. Go to the DMX Address main level.
- 2. Set the starting address (**001–512**).

The highest recommended starting address for each DMX mode is as follows:

DMX Personality	DMX Address	DMX Personality	DMX Address
1Ch	512	12Ch	501
3Ch	510	13Ch	500
5Ch	508	16Ch	497
7Ch	506	HSV	510
10Ch	503		

Menu Map

Refer to the Ovation F-55FC product page on <u>www.chauvetprofessional.com</u> for the latest menu map.

Configuration (Standalone)

Use standalone configuration to operate the product without a DMX controller.

Static Mode

The Static mode allows for an unchanging color without a DMX controller.

Virtual Color Wheel

- 1. Go to the **Virtual Color Wheel** main level.
- 2. Select Virtual Color Wheel.
- 3. Select the desired gel color (see Virtual Color Wheel Chart).
- 4. Select the desired output level (0–255).

Color Temperature

To select a color temperature, do the following:

- 1. Go to the Virtual Color Wheel main level.
- 2. Select Color Temperature.
- 3. Select the desired color temperature (see Color Temperature Chart).
- 4. Select the desired output level (0-255).

Manual Color Mixer

To do color mixing without a DMX controller, follow the instructions below:

- 1. Go to the Virtual Color Wheel main level.
- 2. Select Manual Color Mixer.
- 3. Select the color to edit (Red, Green, Blue, Amber, or Lime).
- 4. Select the desired output level for that color (**0–255**).
- 5. Repeat steps 3 and 4 until product outputs as desired.

Color X-Fade Speed

The Color X-Fade Speed sets the cross-fade speed for Virtual Color Wheel options.

- 1. Go to the Virtual Color Wheel main level.
- 2. Select Color X-Fade Speed.
- 3. Select the desired cross-fade speed (Off, X-Fade Speed 1-4).

Auto Programs

Auto programs allow for dynamic blinder effects without a DMX controller.

- 1. Go to Auto Show main level.
- 2. Select the desired auto program (Auto 1–5).
- 3. Select the desired speed (1–100).

Red Shift

The Red Shift function imitates the dimming of a halogen lamp. To toggle Red Shift:

- 1. Go to the **Red Shift** main level.
- 2. Select On or Off.

Master/Slave

The Master/Slave mode allows a group of Ovation F-55FC products (the slaves) to simultaneously duplicate the output of another Ovation F-55FC (the master) without a DMX controller. To set each of the slaves:

1. Go to the Master/Slave main level

2. Select **Slave**.

To set the master:

- 1. Go to the Master/Slave main level
- 2. Select Master.
- 3. Select a static setting.
 - The master is the one that runs a program whether in Auto or Static mode.
 - Do not connect a DMX controller to the products configured for Master/Slave operation. The
 - DMX controller may interfere with signals from the master.
 - The master should be the first product in the daisy chain.

Dimmer Curve

To set the dimmer curve, follow the instructions below:

- 1. Go to the Dimmer Curve main level.
- 2. Select the desired option (SCurve, Linear, Square, or Inverse Square).

Dimmer Profiles

This setting determines how fast the output of the Ovation F-55FC changes when the output value is modified. It provides four different options to simulate the dimming curve of an incandescent lighting product. To select a specific dimmer profile, do the following:

- 1. Go to the **Dimmer Mode** main level.
- 2. Select a dimmer curve (Off, Dimmer 1, Dimmer 2, or Dimmer 3).

Off: The output is proportional (linear) to the dimmer channel value.

Dimmer 1-3: The output follows the dimmer value based on the corresponding dimmer curve, **Dimmer 1** being the fastest.

White Balance

This setting determines the maximum output values for each color, which affects the appearance of a full output white.

- 1. Go to the White Balance main level.
- 2. Select Off (the product will use a default setting) or Manual.
- 3. For Manual mode, select the color value to edit (Red, Green, Blue, Amber, or Lime Green).
- 4. Set the maximum value for the selected color (125–255).
- 5. Repeat steps 3 and 4 until the product outputs as desired.

LED Frequency

This option changes the Pulse Width Modulation (PWM) frequency of the LEDs on the Ovation F-55FC. To do so, follow the instructions below:

- 1. Go to the **LED Frequency** main level.
- 2. Select PWM Frequency (600Hz, 1200Hz, 2000Hz, 4000Hz, 6000Hz, or 25Khz).

Back Light

This setting allows for selection of the amount of time the backlight on the Ovation F-55FC's display stays on after the last button is pressed on the control panel.

- 1. Go to the Back Light main level.
- 2. Select 10S (10 seconds), 30S (30 seconds), 2Min (2 minutes), or Always On (remains on).

System Information

This option displays essential product information.

- 1. Go to the **Information** main level.
- 2. Select Fixture Hours, LED Hours, Version, or UID.

Factory Reset

This option restores the Ovation F-55FC to factory default settings.

- 1. Go to the Reset Factory main level.
- 2. Select No or Yes.

Virtual Color Wheel (VCW)

The Ovation F-55FC includes a feature called the Virtual Color Wheel (VCW). This feature is available as a standalone control mode for manual use and as a control channel in select DMX personalities. More than 30 premixed colors, blended by Chauvet engineers, are available to call up for easier programming. The DMX values used to mix these colors are provided below. The overall intensity of the Ovation fixture can be adjusted to more closely replicate familiar industry-standard colors. A chart is available at

www.chauvetprofessional.com to compare Chauvet's premixed colors with popular gel colors. This chart is for comparison purposes only and is not an assertion that Chauvet's colors match any listed gel color.

5. Technical Information

Product Maintenance

To maintain optimum performance and minimize wear, clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.

Clean this product at least twice a month. Dust build-up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

To clean the product:

- 1. Unplug the product from power.
- 2. Wait until the product is at room temperature.
- 3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents.
- 4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
- 5. Apply the solution directly to a soft, lint-free cotton cloth or a lens-cleaning tissue.
- 6. Softly drag any dirt or grime to the outside of the transparent surface.
- 7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Returns

Send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags.

Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return.

To submit a service request online, go to <u>www.chauvetprofessional.com/service-request</u>.

Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
