Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions. Download the latest version from www.chauvetprofessional.com

Document Revision

This Amhaze Whisper User Manual is the 1st edition of this document. Go to www.chauvetprofessional.com for the latest version.
2. **BEFORE YOU BEGIN**

**What Is Included**

- Amhaze Whisper
- Seetronic Powerkon IP65 power cord
- Warranty Card
- Quick Reference Guide

**Claims**

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Any reference to power connections in this manual assumes the use of Seetronic IP rated cables.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.
Safety Notes
Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

Personal Safety
• Depending on the amount of haze generated, all haze machines may set off smoke detectors.
• Drain the tank before transporting the product.
• Always disconnect this product from its power source before servicing.
• The product’s nozzle is very hot during operation and it remains hot for a long time after operation has stopped.
• Always connect this product to a grounded circuit to avoid the risk of electrocution.
• Do not drink or become in contact with the haze fluid. If you do, call your local emergency service (911 in the US) for help.
• Do not use for space heating purposes.
• Do not touch this product’s housing during operation because it may be very hot.

Mounting and Rigging
• The product is not intended for permanent installation.
• This product is for indoor use only! To prevent risk of fire or shock, do not expose this product to rain or moisture. (IP20)
• CAUTION: When transferring product from extreme temperature environments, (e.g. cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
• Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
• Make sure there are no flammable materials close to this product while it is operating.
• When hanging this product, always secure to a fastening device using a safety cable.

Power and Wiring
• Always make sure you are connecting this product to the proper voltage in accordance with the specifications in this manual or on the product’s specification label.
• To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
• Never connect this product to a dimmer pack or rheostat.
• Never disconnect this product by pulling or tugging on the power cable.
Operation

- Do not operate this product if you see damage to the housing, fluid tank, or cables. Have the damaged parts replaced by an authorized technician at once.
- Be sure that no ventilation slots on the product’s housing are blocked.
- Never carry the product from the power cord or any moving part. Always use the handles.
- The haze exits the nozzle at a very high temperature and it remains hot for a long time after operation has stopped. Keep a minimum distance of 6.5 ft (2 m) from the nozzle to the nearest object.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at a higher temperature.
- In the event of a serious operating problem, stop using this product immediately!
- Do not add perfume, alcohol, gasoline, or any other flammables to the haze fluid.
- Use only CHAUVET water-based Premium Haze Fluid (PHF) and High Performance Haze Fluid (HFG).

If your Chauvet product requires service, contact Chauvet Technical Support.
3. INTRODUCTION

Description
The Amhaze Whisper is an ideal haze machine for use in television studios and theatrical productions where discreet operation and rapid heat up time are key. The speed of the fan is controllable and the volume of haze fully adjustable up to a maximum of 7000 cfm.

Features
- Professional water-based haze machine
- Quiet operation for theatrical and studio usage
- Removable vent louver for directional haze flow
- Tour-ready with a rugged road case and M12 threaded rigging insert
- Achieve continuous variable haze output and blower speed, adjusted via DMX or manual knobs

Product Overview
INTRODUCTION

Product Dimensions

10.62 in  
270 mm

14.96 in  
380 mm

19.29 in  
490 mm
4. SETUP

AC Power
Each Amhaze Whisper has a fixed power supply that works with an input voltage of either 120 VAC, 60 Hz or 230 VAC, 50 Hz, depending on the specific model. To determine the power requirements for each Amhaze Whisper, refer to the label affixed to the product. You can also refer to the Technical Specifications chart in this manual.

The listed current rating indicates the maximum current draw during normal operation. For more information, download Sizing Circuit Breakers from the Chauvet website: www.chauvetprofessional.com.

- Always connect the product to a protected circuit (circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug
The Amhaze Whisper comes with a power input cord terminated with a Seetronic Powerkon A connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with your product has no plug, or if you need the change the plug, use the table below to wire the new plug.

</tbody>
</table>

DMX Linking
You can link the Amhaze Whisper to a DMX controller using a 3- or 5-pin DMX connection. If using other DMX-compatible products with this product, you can control each individually with a single DMX controller.

DMX Personalities
The Amhaze Whisper uses a 3- or 5-pin DMX data connection for the 2-channel DMX personality.

- Refer to the Introduction for a brief description of each DMX personality.
- Refer to the Operation chapter to learn how to configure the Amhaze Whisper to work in these personalities.
- The DMX Values section provides detailed information regarding the DMX personalities.

If you are not familiar with or need more information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.
Mounting
Before mounting the product, read and follow the safety recommendations indicated in the Safety Notes. For our CHAUVET Professional line of mounting clamps, go to [http://trusst.com/products/](http://trusst.com/products/).

Orientation
Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging
Chauvet recommends using the following general guidelines when mounting this product.
- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which you are mounting the product can support the product's weight. See the [Technical Specifications](#) for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.

Procedure
The Amhaze Whisper includes 4 rubber feet for floor mounting and comes with a threaded mounting hole, size M13, at the top of the hazer. This mounting hole is appropriate for use with a mounting clamp. You must supply the mounting clamps. Make sure the clamps are capable of supporting the weight of this product. Use at least one mounting point per product. For the CHAUVET Professional line of mounting clamps, go to [http://www.trusst.com/products/](http://www.trusst.com/products/).

Mounting Diagram

![Mounting Diagram](image-url)
Preparing for Operation
To prepare the Amhaze Whisper for operation:
1. Open the flight case.
2. Pull out the fluid tank and remove the cap.
3. Verify that the two plastic hoses attached to the inside of the cap are in place and in good condition.
4. Pour Chauvet (PHF or HFG) haze fluid inside the tank, and re-cap.
5. Reinsert the tank.
6. Make sure that the plastic hose that goes from the cap to the hazer is not bent.
7. Plug in power and wait approximately 30 seconds for warm-up to complete.

Only use Chauvet approved (PHF or HFG) haze fluid. Otherwise, you might not have satisfactory results. In addition, unapproved fluid can damage the Amhaze Whisper or cause harm to humans or animals.

When storing the product, ALWAYS be sure to store the fluid tank with the cap up, as seen on the storage diagram below before installing the front cover to avoid tube damage that may cause leakage.

Storage
Before storing this product, be sure that the fluid container is placed inside the product correctly with the cap facing up.

Control Options

Set the Amhaze Whisper starting address in the 001-512 DMX range. This enables control of up to 256 products in the 2-channel personality.

Programming

Refer to the Menu Map to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the desired main level, press <FUNCTION> repeatedly until the option shows on the display. This will take you to the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until the option shows on the display. If there is another programming level, you will see that first option, or you will see the selected value.
- Press <FUNCTION> repeatedly to exit to the previous main level.

Menu Map

<table>
<thead>
<tr>
<th>Main Level</th>
<th>Programming Levels</th>

<td>Sets the Interval between haze bursts</td>
</tr>
<tr>
<td>Duration Set</td>
<td>10 ~ 255</td>
<td>Sets how long the burst of haze will last</td>
</tr>
</tbody>
</table>
Configuration (DMX)
Use DMX configurations to operate the product with a DMX controller.

DMX Control
In this mode, each product will respond to a unique starting address from the DMX controller. All products with the same starting address will respond in unison.

1. Go to **DMX Add**. main level.
2. Select the starting address (001–512).

**DMX Values**

</tr>
</tbody>
</table>

Configuration (Standalone)
Use standalone configuration to operate the product without a DMX controller.

**Interval**

1. Go to **Interval Set** main level
2. Select the desired speed (10-300)

**Duration**

1. Go to the **Duration Set** main level
2. Select how long the haze flow will last (10-255)
6. TECHNICAL INFORMATION

Product Maintenance

Do not allow the haze machine to become clogged. After every 40 hours of continuous operation, use CHAUVET Fog Cleaner Quart (FCQ) through the system to prevent the accumulation of particulate matter in the heating element. The recommended cleaning procedure is as follows:

1. Unplug the product from power.
2. Empty all haze fluid from the machine.
3. Add cleaning solution to the tank.
4. Connect the product to power and allow it to warm up.
5. Run the unit in a well-ventilated area until the tank is empty.
6. Refill with haze fluid to continue using the hazer. Run the machine briefly to clear any cleaning solution from the pump and heater.

- FCQ (Fog Cleaner Quart) was specifically developed by CHAUVET to clean your Amhaze Whisper. Make sure you use FCQ regularly to increase the life of your hazer.
- Do not spin the fans using compressed air because you could damage the hazer.
- Test-run your Amhaze Studio on a monthly basis to achieve the best performance.

Storage

Before storing the hazer, run FCQ through the system as described in the cleaning procedure above; however, only follow steps 1 through 5. Do not refill the tank with hazer fluid if storing the hazer. Cleaning the system prior to storage will help prevent any particles from condensing inside the pump or heater while not in use.
## 7. Technical Specifications

RoHS
**RETURNS**

Send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags.

Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return.

Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

- **Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.**

Once you have the RMA number, provide the following information on a piece of paper and place it inside the box:

  - Your name
  - Your address
  - Your phone number
  - RMA number
  - A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

- **Chauvet reserves the right to use its own discretion to repair or replace returned product(s).**
