

ÉPIX

DRIVE 2000 IP

User Manual

Model ID: EPIXDRIVE2000IP

Edition Notes

The ÉPIX Drive 2000 IP User Manual includes a description, safety precautions, installation, programming, operation and maintenance instructions for the ÉPIX Drive 2000 IP as of the release date of this edition.

Trademarks

Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident, or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions.

Before You Begin

1. Before You Begin

What Is Included

- ÉPIX Drive 2000 IP
- Seetronic Powerkon IP65 power cable
- Omega bracket with mounting hardware
- 2 rack ears with screws
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate a claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
<ENTER>	A key to be pressed on the product's control panel

Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

FCC Statement of Compliance

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- **CAUTION:**

- This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.

- **ALWAYS:**

- Disconnect from power before cleaning the product.
- When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.
- Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.
- Use a safety cable when mounting this product overhead.
- Connect this product to a grounded and protected circuit.

- **DO NOT:**

- Open this product. It contains no user-serviceable parts.
- Leave any flammable material within 50 cm of this product while operating or connected to power.
- Connect this product to a dimmer or rheostat.
- Operate this product if the housing or cables appear damaged.
- Submerge this product (adhere to standards for the published IP rating). Regular outdoor operation is fine.
- Permanently install outdoors in locations with extreme environmental conditions. This includes, but is not limited to:
 - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
 - Locations where normal temperatures exceed the temperature ranges in this manual.
 - Locations that are prone to flooding or being buried in snow.
 - Other areas where the product will be subject to extreme radiation or caustic substances.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- In the event of a serious operating problem, stop using immediately.

If a Chauvet product requires service, contact Chauvet Technical Support.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

2. Introduction

Features

- The processing and power center of the ÉPIX Tour and IP system will drive any combination of ÉPIX Tour and IP products, up to 2,000 LEDs
- Versatile control options include Art-Net, Kling-Net, and sACN (streaming ACN) to support the touring/rental/installation markets
- Quickly and easily configure the ÉPIX Drive 2000 IP using the built-in OLED display and touchscreen menu
- Easily detect and automatically configure your devices using the auto-address function, regardless of fixture order or type (Bar/Strip/Strip IP)
- Supports up to 20 ÉPIX Strip IP, 40 ÉPIX Strip IP 50, 36 ÉPIX Strip Tours, 72 ÉPIX Strip Tour 50, or 12 ÉPIX Bar Tour products
- Easily daisy chain fixtures directly from the 2 outputs of the ÉPIX Drive 2000 IP
- Advanced power management design allows you to position the ÉPIX Drive 2000 IP up to 150 ft away from your last fixture (using unshielded cable)
- Works with Arkaos Media Master Express and the Kling-net control protocol for a plug-n-play system that requires almost no training to operate

Product Overview

#	Name

3	Seetronic Etherkon® IP65 in/out
4	Seetronic Powerkon® IP65 out
5	ÉPIX products output

Product Dimensions

3. Setup

AC Power

The ÉPIX Drive 2000 IP has an auto-ranging power supply and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart.

The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

- **Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.**

AC Plug

The ÉPIX Drive 2000 IP comes with a power input cable terminated with a Seetronic Powerkon IP65 connector on one end and an Edison plug on the other end (U.S. market). If necessary, use the table below to wire a new plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Power Linking

It is possible to power link ÉPIX Drive 2000 IP products. See the table below for the current draw at each voltage and frequency:

	120 V, 60 Hz	208 V, 60 Hz	230 V, 50 Hz
Current Draw	4.68 A	2.69 A	2.5 A

Never exceed 12 A on a single circuit. Power-linking cables can be purchased separately.

- **When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.**
- **Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.**

Mounting

The ÉPIX Drive 2000 IP fits nicely on a standard 19" rack, sits on a flat level surface, or mounts overhead with the included Omega bracket.

Before mounting the product, read and follow the safety recommendations indicated in the Safety Notes.

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure and attachment points can support the weight before hanging the product. See the [Technical Specifications](#) for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.

Procedure

The ÉPIX Drive 2000 IP comes with an Omega bracket. The user can directly attach a mounting clamp (sold separately) to this Omega bracket. Make sure the clamps are capable of supporting the weight of this product. For the Chauvet Professional line of mounting clamps, go to <http://www.trusst.com/products>.

Mounting Diagram

Signal Connections

The ÉPIX Drive 2000 IP can receive an Art-Net™, sACN, or Kling-Net signal. The ÉPIX Drive 2000 IP has 2 Seetronic Etherkon through ports, and 2 4-pin XLR output ports. If using other compatible products with this product, it is possible to control each individually with a single controller.

Art-Net™ Connection

Art-Net™ is an Ethernet protocol that uses TCP/IP that transfers a large amount of DMX512 data using an Seetronic Etherkon IP65 ethernet connection over a large network. An Art-Net™ protocol document is available from www.chauvetprofessional.com.

Art-Net™ designed by and copyright Artistic Licence Holdings Ltd.

sACN Connection

Also known as ANSI E1.31, streaming ACN is an Ethernet protocol that uses the layering and formatting of Architecture for Control Networks to transport DMX512 data over IP or any other ACN-compatible network.

Kling-Net Connection

Kling-Net is a network protocol that allows auto configuration of display devices using a Seetronic Etherkon IP65 ethernet connection. Refer to the ArKaos software manual for detailed instructions on programming this product.

Connection Diagram

4. Operation

Control Panel Description

Button	Name	Function
	<LEFT>	Exits from the current menu or function or cycles through the main level of the menu
	<RIGHT>	Enables the currently displayed menu or sets the currently selected value into the selected function
	<UP>	Navigates upwards through the menu list or increases the numeric value when in a function
	<DOWN>	Navigates downwards through the menu list or decreases the numeric value when in a function

Programming

Refer to the menu map to understand the menu options. The menu map shows the main menu and a variable number of programming levels for each option.

- To access the main menu, press <LEFT>.
- To access the main menu from the [Home Screen](#), press <LEFT>.
- To navigate to the desired option in the main menu, press <LEFT> repeatedly until the option is indicated, or use <UP> or <DOWN> to navigate directly.
- Press <RIGHT> to select the indicated option.
- Use <UP> or <DOWN> to navigate within a programming level until the desired option is indicated.
- To return to the main menu, press <LEFT> repeatedly until it shows on the display.
- Press and hold <LEFT> for 3 seconds to return to the home screen.

Control options can also be accessed through the [Web Server](#).

Home Screen

The ÉPIX Drive 2000 IP has a home screen that shows the current control protocols, personalities, starting addresses, starting universes, and IP addresses for each port.

Control Panel Lock

The setting locks or unlocks the control panel.

1. Go to the **Screen Lock** main level.
2. Select **No** (control panel stays unlocked) or **Yes** (locks control panel).

When the control panel lock is activated, the product will prompt for the passcode in order to access the menu. Enter the passcode as described below.

Passcode

When prompted to enter the passcode, press <UP>, <DOWN>, <UP>, <DOWN>, <RIGHT>.

Operation

Menu Map

Refer to the ÉPIX Drive 2000 IP product page on www.chauvetprofessional.com for the latest menu map.

Main Level	Programming Levels			Description
Auto Address	No			Automatically finds and addresses the products
	Yes			
View Linked Fixtures	Port A	1. _ _ _ – 72. _ _ _		Displays the connected products
	Port B			
LED Output	Off			Turns off all LED output
	Red			Red LEDs at full
	Green			Green LEDs at full
	Blue			Blue LEDs at full
	White			All LEDs at full
	Fade			Color fade program
	Scroll			Color scroll program
Protocol	Port A	Art-Net		Selects the protocol for each port and determines what other menu options are available
		Kling-Net	_____	
		sACN		
	Port B	Art-Net		
		Kling-Net	_____	
		sACN		
Display Inverse	No			Rotates display 180°
	Yes			
Factory Reset	No			Resets the product to factory defaults
	Yes			
Port A–B (Art-Net™ and sACN only)	Personality	Pixel		Sets the control personality for Port A or B
		7-CH-Drive		
		8-CH-fixture		
		5-Section		
		10-Section		
		25-Section		
		50-Section		
		301-CH		
	Universe	000–246 (Art-Net™) 001–247 (sACN)		Sets the lowest of the 10 consecutive universes to which Port A or B is assigned
	IP Address	IP Address #1–10	1–126 . 0–255 . 0–255 . 0–255	Sets the IP addresses for Port A or B Note: All IP addresses must be unique
DMX Address	001–_ _ _		Sets the starting address for Port A or B (highest channel set by Personality)	
Screen Lock	No			Locks screen. Passcode: <UP>, <DOWN>, <UP>, <DOWN>, <RIGHT>
	Yes			
Dimmer Curve	S Curve			Set the dimmer curve
	Linear			
	Square			
	Inverse Square			
Software Version	Port A:-----V _._ _ Port B:-----V _._ _			Displays the current software version
Error Messages	-----			Shows if either port is overloaded, or No Errors.

Ethernet Configuration

The ÉPIX Drive 2000 IP operates by routing one of three ethernet protocols (Art-Net™, sACN, or Kling-Net) to the ÉPIX IP and ÉPIX Tour products linked to the outputs of the Drive. The Ethernet protocol must be set for the products to respond correctly to the controller.

Protocol

To configure the protocol for each port of the ÉPIX Drive 2000 IP:

1. Go to the **Protocol** main level.
2. Select from **Port A** or **Port B**.
3. Select the desired protocol, from **Art-Net**, **Kling-Net**, or **sACN**.

Control Personality

The ÉPIX Drive 2000 IP uses Art-Net™ or sACN for its 7 control personalities:

Personality	Channels	Description
Pixel	300 per ÉPIX Strip IP	Complete pixel control
7-CH-Drive	7	Dimmer, auto programs, and strobe
8-CH-fixture	8 per product	Dimmer, auto programs, strobe, and dimmer speed
5-Section	15 per ÉPIX Strip IP	Controls LED output in 5 groups of 20 LEDs
10-Section	30 per ÉPIX Strip IP	Controls LED output in 10 groups of 10 LEDs
25-Section	75 per ÉPIX Strip IP	Controls LED output in 25 groups of 4 LEDs
50-Section	150 per ÉPIX Strip IP	Controls LED output in 50 groups of 2 LEDs
301-CH	301 per ÉPIX Strip IP	Complete pixel control with dimmer

To select the control personality for either port, follow the instructions below:

1. Go to the **Port A** or **Port B** main level.
2. Select the **Personality** option.
3. Select the desired personality, from **Pixel**, **7-CH-Drive**, **8-CH-fixture**, **5-Section**, **10-Section**, **25-Section**, **50-Section**, or **301-CH**.

Start Universe

Each ÉPIX Drive 2000 IP uses 10 consecutive universes in Art-Net™ mode and sACN mode, which are assigned by setting the starting (lowest-numbered) universe address.

To set the starting universe for either port, do the following:

1. Go to the **Port A** or **Port B** main level.
2. Select the **Universe** option.
3. Set the lowest consecutive universe for the selected port, from (Art-Net™) **000–246**, or from (sACN) **001–247**.

IP Address

For each universe of each port on the ÉPIX Drive 2000 IP, there must be a unique IP address. To set these IP addresses for either port, follow the instructions below:

1. Go to the **Port A** or **Port B** main level.
2. Select the **IP Address** option.
3. Select which address to set, from **IP Address #1–10**.
4. Set the first number in the IP address, from **1–126**.
5. Set the second number, from **0–255**.
6. Repeat step 5 for the third and fourth numbers in the IP address.

DMX Address

To set the starting address for either port of the ÉPIX Drive 2000 IP, do the following:

1. Go to the **Port A** or **Port B** main level.
2. Select the **DMX Address** option.
3. Set the starting address for the selected port, from **001–_ _ _**.

Highest address available determined by the [Control Personality](#).

Auto Address

The ÉPIX Drive 2000 IP addresses connected products with the Auto Address function. To perform an Auto Address, follow the instructions below:

1. Go to the **Auto Address** main level.
2. Select from **No** (do not perform Auto Address) or **Yes** (perform Auto Address).

Control Channel Assignments and Values

Settings Configuration

View Linked Fixtures

To view which fixtures are linked in order from each port:

1. Go to the **View Linked Fixtures** main level.
2. Select from **Port A** or **Port B**.
3. Use **<UP>** or **<DOWN>** to scroll through the list of linked fixtures for the selected port.

Output Test

To test the output of the LEDs of all connected ÉPIX products:

1. Go to the **LED Output** main level.
2. Select from **Off** (no LED output), **Red** (red LEDs at maximum), **Green** (green LEDs at maximum), **Blue** (blue LEDs at maximum), **White** (all LEDs at maximum), **Fade** (color fade program), or **Scroll** (color scroll program).

Display Inverse

To flip the display of the ÉPIX Drive 2000 IP 180°, press **<LEFT>** and **<RIGHT>** together, or do the following:

1. Go to the **Display Inverse** main level.
2. Select from **No** (normal display) or **Yes** (inverted display).

Factory Reset

To reset the ÉPIX Drive 2000 IP to factory default settings:

1. Go to the **Factory Reset** main level.
2. Select from **No** (do not factory reset) or **Yes** (reset to factory defaults).

Dimmer Curve

To set the dimmer curve:

1. Go to the **Dimmer Curve** main level.
2. Select from **S Curve**, **Linear**, **Square**, or **Inverse Square**.

Software Version

To view the current software version for both ports, follow the instructions below:

1. Press **<LEFT>** repeatedly until **Software Version** is selected.
2. Press **<RIGHT>**.

Error Messages

To see any current error messages:

1. Go to the **Error Messages** main level.
2. The error message(s) will show on the display, such as "**Port A overloaded !**". If there is no error message, "**No Errors.**" will show on the display.

Operation

Web Server

The ÉPIX Drive 2000 IP Web Server can be accessed by any computer on the same network as the product. It allows network access to system information, settings such as control protocol and starting address, color output testing, and the ability to change the Web Server password.

1. Connect the product to a Windows computer with a network cable.
2. On the computer, set the IP address of the new network to have the same first 3 digits as the IP address of the product (See [IP Address](#)).
3. Enter the IP address of the product into the URL bar of a web browser on the computer.
4. Enter both the User Name and Password as **admin** to log in.

Home

The Web Server Home page displays the details of all available control personalities and the technical specifications for the ÉPIX Drive 2000 IP.

Settings

The Web Server Settings page provides options for control. From the drop-down menus, the Protocol, Universe, Start Address, IP Address, Ethernet to DMX, Personality, Dimmer Curve, Dimmer Mode, and PWM Frequency can all be edited. Click **Save Settings** to send the new configuration to the product.

Output

On the Web Server Output page, an output test of the product's LEDs can be performed, by either editing the values of each LED manually (by typing the number or moving the fader), or by selecting a sample color. The page will show the current output color on the bottom left.

Security

The Web Server Security page gives the option to change the password to the connected product's web server. Enter the old password (**admin**, by default) and the new password twice, then click **Save Settings** to change the password.

Firmware Update

On occasion, updates to the firmware for the ÉPIX Drive 2000 IP will be made available. The following is the procedure for obtaining and installing these updates on a Windows PC.

Instructions

1. Download the CHAUVET Professional Uploader from <http://www.chauvetprofessional.com/products/epix-drive-2000-ip> and install it.
2. Download the latest firmware update from <http://www.chauvetprofessional.com/products/epix-drive-2000-ip>.
 - After downloading the software and update file, disable or disconnect any networks the PC is connected to. Do NOT disable the network created when the ÉPIX Drive 2000 IP is connected in the next step.
3. Power on the ÉPIX Drive 2000 IP and connect it to the computer using an ethernet cable.
4. Open the ÉPIX Drive 2000 IP upload software.
5. Use the **Browse** option to select the latest firmware update to upload.
 - Note:** ALWAYS upload the **B** file before the **A** file.
6. Click **Next**.
7. Click **Find Compatible Devices**.
8. Click **Next** when the software indicates a device has been found.
 - If the software cannot find the ÉPIX Drive 2000 IP on the network, see [Force Upload Instructions](#).

9. Select the check-box next to ÉPIX Drive 2000 B or ÉPIX Drive 2000 A. (Always upload the **B** file before the **A** file.)
10. Click **Upload Firmware**.
11. Wait for the upload to complete. Do NOT disconnect or power off the product during this process.
12. When the status field says **Done**, exit out of the upload software.
13. Restart from step 4, uploading the **A** file this time. After uploading the **A** file, skip this step.
14. Disconnect the ÉPIX Drive 2000 IP from the computer. The firmware update is complete.

Force Upload Instructions

In the event that the upload software cannot find the ÉPIX Drive 2000 IP on the network, or if the display on the product is black when powered on, follow the instructions below.

1. Set the IP address of the network on the PC to 192.168.1.24, and the subnet to 255.255.255.0.
2. Turn off the ÉPIX Drive 2000 IP. Turn it back on and immediately press and hold **<LEFT>** and **<RIGHT>**. A green LED above the display menu will flash, indicating the product is in Force Upload mode.
3. After selecting the firmware update file (Always upload the **B** file before the **A** file!) and continuing to the **Find Compatible Devices** page, check off the **Force Upload** option.
4. Click **Next**.
5. Click **Upload Firmware**.

6. Wait for the upload to complete. Do NOT disconnect or power off the product during this process.
7. When the upload is complete, exit out of the upload software.
8. Restart from step 2, turning the product off and back on again in Force Upload mode, restarting the upload software, and selecting the **A** file this time. After uploading the **A** file, skip this step.
9. Disconnect the ÉPIX Drive 2000 IP from the computer. The firmware update is complete.

In the event that the [Software Version](#) section of the menu lists **V0.0** for **Port B**, do the following:

1. Follow steps 1 through 3 in the [Instructions](#) under [Firmware Update](#).
2. Press and hold **<RIGHT>** on the ÉPIX Drive 2000 IP until **Force Upload!** shows on the display.
3. Open the ÉPIX Drive 2000 IP upload software.
4. Use the **Browse** option and select the **B** file.
5. Click **Next**.
6. Check off the **Force Upload** option and click **Next**.
7. Click **Upload Firmware**.
8. Wait for the upload to complete. Do NOT disconnect or power off the product during this process.
9. When the upload is complete, exit out of the upload software.

Error Codes

See the table below for error codes and recommended solutions:

Error Code	Possible Reason	Potential Solution
Port A overloaded !	The indicated port has more than: • 10 ÉPIX Strip IP, • 20 ÉPIX Strip IP 50, • 18 ÉPIX Strip Tours, • 36 ÉPIX Strip Tour 50, or • 6 ÉPIX Bar Tour products connected, or a combination totaling more than 1000 LEDs.	Remove products from the indicated port until no more than: • 10 ÉPIX Strip IP, • 20 ÉPIX Strip IP 50, • 18 ÉPIX Strip Tours, • 36 ÉPIX Strip Tour 50, or • 6 ÉPIX Bar Tour products are connected, or a combination totaling no more than 1000 LEDs.
Port B overloaded !		

5. Maintenance

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean each lighting product at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.
