Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

1. Before You Begin

What Is Included

- Rogue Outcast 1 Hybrid
- Seetronic Powerkon IP65 power cord
- 2 Omega brackets with mounting hardware
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Manual Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
<SET>	A button on the product's control panel
Settings	A product function or a menu option

Symbols

Symbol	Meaning
	Electrical warning. Not following these instructions may cause electrical damage to the product, accessories, or the user.
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.
	The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Do not touch the product's housing when operating because it may be very hot.

Mounting and Rigging

- The product is intended for professional use only.
- IP65, temporary outdoor/wet use
- CAUTION: When transferring product from extreme temperature environments, (e.g., cold truck to warm, humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Always ask for help when mounting this product to avoid personal injuries or damage to the product
- Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- Make sure there are no flammable materials close to the product when operating.
- When hanging this product, always secure to a fastening device using a safety cable.
- The product should be positioned so that prolonged staring into the luminaire at a distance closer than 2.3 m is not expected.

Power and Wiring

- Always make sure you are connecting the product to the proper voltage in accordance with the specifications in this manual or on the product's specification label.
- Never connect the product to a dimmer pack or rheostat.
- Never disconnect this product by pulling or tugging on the power cable.
- If the external flexible cable or cord of this product is damaged, it shall be replaced with a special cable or cord exclusively available from the manufacturer or its service agent.

Operation

- Do not operate this product if there is damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- Do not aim this product toward the sun. The lenses could concentrate the solar energy and cause internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate the product at higher temperatures.
- In the event of a serious operation problem, stop using this product immediately!

If your Chauvet product requires service, contact Chauvet Technical Support.

2. Introduction

Description

The Rogue Outcast 1 Hybrid is an outdoor-ready, IP65 spot/beam/wash moving head ideal for small to medium festivals and events. Powered by an intense 400W lamp, Rogue Outcast 1 Hybrid delivers a 6500 K output with tight beam angles of 1° to 5.2° in Beam Mode and a zoom range of 2.2° to 29.1° in Spot Mode and 4.9° to 28.3° in Wash Mode for maximum visual impact. This feature-packed unit offers 1 rotating and 1 static gobo wheel, 2 individually controllable 8- and 5-facet stackable prisms, and a 14-hue color wheel for solid and split colors. Control is over DMX and RDM.

Features

- Fully featured, IP65-rated, high-powered Spot/Beam/Wash combination fixture with an USHIO 400 W, 6500 K with 6,000 hour life expectancy lamp, two gobo wheels, two-layer prisms, and linear zoom.
- Rugged housing designed to withstand the elements in a temporary outdoor setting
- Six-facet linear and eight-facet round prisms for maximizing visual impact
- Frost and beam flattening options for even light distribution
- Tight 1° narrow beam angle for focused air effects
- Zoom of 1° to 15.3° in beam mode, 2.2° to 29.1° in spot mode, and 4.9° to 28.3° in wash mode for coverage in any application
- 9 rotating and 13 static gobos for massive visual effect
- DMX and RDM protocol control
- True 1-compatible power input

Product Overview

Product Dimensions

3. Setup

AC Power

Each Rogue Outcast 1 Hybrid has an auto-ranging power supply that works with an input voltage range of 100 to 240 VAC, 50/60 Hz. To determine the power requirements for each Rogue Outcast 1 Hybrid, refer to the label affixed to the product. You can also refer to the [Technical Specifications](#) chart in this manual.

The listed current rating indicates the maximum current draw during normal operation. For more information, download Sizing Circuit Breakers from the Chauvet website: www.chauvetprofessional.com.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The Rogue Outcast 1 Hybrid comes with a power input cord terminated with a Seetronic Powerkon IP 65 connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with the product has no plug, or if the plug needs to be changed, use the table below to wire the new plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse and replace with another fuse of the same type and rating (F 8 A, 250 V).
4. Screw the fuse holder cap back in place and reconnect power.

Make sure to disconnect the product's power cord before replacing a blown fuse. Always replace the blown fuse with another of the same type and rating.

DMX Linking

The Rogue Outcast 1 Hybrid can be linked to a DMX controller using a 5-pin IP-rated DMX connection. If using other DMX-compatible products with this product, each can be controlled individually with a single DMX controller.

DMX Personalities

The Rogue Outcast 1 Hybrid uses a 5-pin IP-rated DMX data connection for the 20- and 25-channel DMX personalities.

- Refer to the [Introduction](#) for a brief description of each DMX personality.
- Refer to the [Operation](#) chapter to learn how to configure the Rogue Outcast 1 Hybrid to work in these personalities.
- The [DMX Values](#) section provides detailed information regarding the DMX personalities.

Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Rogue Outcast 1 Hybrid supports RDM protocol that allows feedback to make changes to menu map options.

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#). For our CHAUVET Professional line of mounting clamps, go to <http://trusst.com/products/>.

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which you are mounting the product can support the product's weight. See the [Technical Specifications](#) for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power linking cables to reach.
- The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

Procedure

The Rogue Outcast 1 Hybrid comes with a double-bracketed yoke to which you can either attach mounting clamps for hanging or simply use as a floor stand. You must supply the mounting clamps. Make sure the clamps are capable of supporting the weight of this product. Use at least one mounting point per product. For the CHAUVET Professional line of mounting clamps, go to <http://www.trusst.com/products>.

Mounting Diagram

Lamp Replacement

The Rogue Outcast 1 Hybrid is equipped with an USHIO NSL 400-W lamp. Follow the procedure below to safely change the lamp,

Disconnect the product from power before opening.

Procedure

1. Turn the product off and disconnect it from power. Wait at least 15 minutes for the lamp to cool down.
2. Remove both head covers by removing 8 Phillips-head ¼-turn screws.
3. Orient the bottom of the moving head so that the fan is facing downward.
4. Remove the 2 wires connected to the lamp by the spade terminals. Using the lamp base, push the lamp to the left against the spring clips located on the left.
5. Roll the lamp out the top and pull it away.
6. Reverse the steps above to install the new lamp. Do not touch the glass with bare hands.

Do not turn product on without a lamp!

Increasing Lamp Life

- ALWAYS turn the lamp off by using the DMX controller or the product's control panel, then wait at least 5 minutes before switching off the product. This will keep the fans running to extract any remaining heat from the product's head.
- DO NOT power cycle the product unless it is necessary.
- DO NOT re-strike the lamp immediately after turning it off. Chauvet recommends waiting 5 minutes before trying to re-strike the lamp.
- DO NOT touch the lamp without wearing gloves to avoid leaving grease on the bulb or on the contacts that could reduce the lamp's life.
- ALWAYS change the lamp when it has reached its recommended lifespan to avoid the risk of lamp explosion.

4. Operation

Control Panel Operation

Button	Function
<MENU>	Exits from the current menu or function
<ENTER>	Enables the currently displayed menu or sets the currently selected value in to the current function
<UP>	Navigates upward through the menu list or increases the numeric value when in a function
<DOWN>	Navigates downward through the menu list or decreases the numeric value when in a function

Programming

Refer to the Menu Map to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the desired main level, press <MENU> repeatedly until the option shows on the display. Press <ENTER> to select. This will take you to the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until the option shows on the display. Press <ENTER> to select. In this case, if there is another programming level, you will see that first option, or you will see the selected value.
- Press <MENU> repeatedly to exit to the previous main level.

Control Panel Lock

This setting enables you to activate or disable the control panel lock, which keeps unauthorized users from changing the product's settings.

1. Go to the **Key Lock** main level.
2. Select **ON** or **OFF**.

The product will prompt for a passcode to access the product's main programming level when the control panel lock is activated. Enter the following passcode: <UP>, <DOWN>, <UP>, <DOWN>, <ENTER>

Configuration (DMX)

Use control configurations to operate the product with a DMX controller. For information on how to configure wireless DMX, see [DMX Linking](#).

Control Personalities

This setting allows you to choose a particular control personality.

1. Go to the **Running Mode** main level, then the **DMX** sublevel.
2. Select the desired personality (**20CH** or **25CH**).

- See the [Starting Address](#) section for the highest starting address you can select for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

Each product will respond to a unique starting address from the DMX controller. All products with the same starting address will respond in unison.

1. Starting from the Main Level screen, select **Address**, press <ENTER>.
2. Select the starting address (**001–512**), press <ENTER>.

The highest recommended starting address for each DMX mode is as follows:

Personality	Address
20CH	493
25CH	487

Menu Map

Refer to the Rogue Outcast 1 Hybrid product page on www.chauvetprofessional.com for the latest menu map.

Color Wheel

The Rogue Outcast 1 Hybrid includes one color wheel with 13 fixed colors plus open (white), as indicated below. The diagram shows the color on the wheel, as mentioned in the [DMX Values](#) tables.

OPERATION

Gobo Wheel

The Rogue Outcast 1 Hybrid includes one static gobo wheel with 13 fixed gobos plus open, and one rotating gobo wheel with 9 gobos. The diagram shows the gobo number on the wheel as numbered in the [DMX Values](#) tables.

Gobo Wheel 1

Gobo Wheel 2

Configuration (Standalone)

Use the standalone configuration to operate the product without a DMX controller.

Run Mode

This programming level sets the DMX personality and controls the different test modes.

- Starting from the Main Level screen, select **Run Mode**, press **<ENTER>**.

Auto Test

This option runs every attribute individually through one cycle.

- Highlight **Auto Test**, press **<ENTER>**.

The Auto Test will end after one full cycle. You can stop the test by pressing <MENU> at any time.

Manual Test

This option allows each attribute to run individually or as a group.

1. Highlight **Manual Test**, press **<ENTER>**.
2. Highlight the desired attribute listed on the control panel screen, press **<ENTER>**.
3. Set the attribute value (**000–255**), press **<ENTER>**.
4. Repeat step 2 for the other attributes.

When exiting the Manual Test level, the values of all tested channels will revert to zero.

Setup

This programming level controls the product's head movement, display, dimming, lamp settings, and maintenance adjustments.

- Starting from the Main Level screen, select **Setup**, press **<ENTER>**.

Pan Reverse

This option reverses the operation of the pan attribute.

1. Highlight **Pan Reverse**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

Tilt Reverse

This option reverses the operation of the tilt attribute.

1. Highlight **Tilt Reverse**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

Screen Reverse

This option selects how the screen is displayed.

1. Highlight **Screen Reverse**, press **<ENTER>**.
2. Select **YES** (inverted screen display), **NO** (normal screen display), or **AUT** (automatic screen display), press **<ENTER>**.

Pan Angle

This option assigns pan range.

1. Highlight **Pan Angle**, press **<ENTER>**.
2. Select **180**, **360**, or **540**, press **<ENTER>**.

Tilt Angle

This option assigns tilt range.

1. Highlight **Tilt Angle**, press **<ENTER>**.
2. Select **90**, **180**, or **260**, press **<ENTER>**.

BL.O. P/T Move

This option enables/disables blackout on pan/tilt move.

1. Highlight **BL.O.P/T Move**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

OPERATION

BL.O. Color Move

This option enables/disables blackout on color wheel move.

1. Highlight **BL.O.Color Move**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

BL.O. Gobo Move

This option enables/disables blackout on gobo wheel move.

1. Highlight **BL.O.Gobo Move**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

Lamp Controls

This programming level allows the user to change a range of options that control the action of the lamp.

- Starting from the **Setup** screen level, select **Lamp Settings**, press <ENTER>.

Lamp settings

This option turns the lamp on and off.

1. Highlight **On/Off**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

- **Do not turn product on without a lamp!**
- **ALWAYS turn the lamp off by using the DMX controller or the product's control panel, then wait at least 5 minutes before switching off the product. This will keep the fans running to extract any remaining heat from the product's head.**
- **DO NOT power cycle the product unless it is necessary.**
- **DO NOT re-strike the lamp immediately after turning it off. Chauvet recommends waiting 5 minutes before trying to re-strike the lamp.**

Lamp state

This option determines whether the lamp turns on automatically when the product is powered up.

1. Highlight **State/Power on**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

Remote turn off

This option allows a connected DMX controller to turn the lamp on/off via the control channel.

1. Highlight **Off via DMX**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

Lamp on if DMX present

This option determines whether the lamp turns on automatically when a DMX signal is detected.

1. Highlight **On if DMX On**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

Lamp off if DMX absent

This option determines whether the lamp turns off automatically when a DMX signal is lost.

1. Highlight **Off if Dmx Off**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

Lamp strike delay

This option sets the duration of time (seconds) it takes for the lamp to turn on when powering up the product.

1. Highlight **Ignition Delay**, press <ENTER>.
2. Select **0–255**, press <ENTER>.

Lamp low power state

This attribute puts the lamp into a low power state when the shutters are closed, helping to increase the life of the shutters. This option allows the user to adjust how long from the instant the shutters are closed to the time the lamp enters the low power state.

1. Highlight **Low Power Delay**, press <ENTER>.
2. Select **0–255**, press <ENTER>.

Lamp timer

This procedure resets the lamp maintenance timer to **0**. It is recommended that this be done after every lamp change.

1. Highlight **Reset Lamp Time**, press <ENTER>.
2. Select **YES** or **NO**, press <ENTER>.

Maintenance Timer

This programming level allows the user to change a range of options that control the action of the maintenance timer.

- Starting from the **Setup** screen level, select **Maintenance Timer**, press **<ENTER>**.

Maintenance timer interval

This option defines the amount of time (hours) that the maintenance timer will count down to.

1. Highlight **Interval Time**, press **<ENTER>**.
2. Select **010–250**, press **<ENTER>**.

Maintenance timer reset

This procedure resets the lamp maintenance timer to **0**. It is recommended that this be done after every lamp change.

1. Highlight **Remain Time**, press **<ENTER>**.
2. Select **010–250**, press **<ENTER>**.

Reset Function

This programming level allows the user to reset individual functions to the home position.

- Starting from the **Setup** screen level, select **Reset Function**, press **<ENTER>**.

Pan/Tilt Reset

This option resets the pan/tilt functions to the home position.

1. Highlight **Pan/Tilt**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

Shutter/Prism Reset

This option resets the shutter/prism functions to the home position.

1. Highlight **Shutter/Prism**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

Color Reset

This option resets the color functions to the home position.

1. Highlight **Color**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

Gobo Reset

This option resets the gobo functions to the home position.

1. Highlight **Gobo**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

Zoom/Frost/Focus Reset

This option resets the frost/focus functions to the home position.

1. Highlight **Zoom/Frost/Focus**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

All Reset

This option resets the all the functions to the home position.

1. Highlight **All**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

Factory Reset Function

This resets the product back to its original factory settings.

1. Starting from the **Setup** screen level, select **Factory Settings**, press **<ENTER>**.
2. Select **YES** or **NO**, press **<ENTER>**.

System Information

This programming level shows standard information regarding the product's operating status. Starting from the Main Level screen, select **Sys Info**, press **<ENTER>**.

- **Display Ver:** The current software version is displayed on the screen.
- **PanTilt Ver:** The current pan/tilt version is displayed on the screen.
- **Prism Ver:** The current prism version is displayed on the screen.
- **Gobo Ver:** The current gobo version is displayed on the screen.
- **Running Mode:** The current running mode is displayed on the screen.
- **DMX Address:** The current DMX address is displayed on the screen.
- **Lamp On Time:** The current lamp on time is displayed on the screen.
- **Remain Time:** The current lamp maintenance time is displayed on the screen.
- **Temperature:** The current product temperature is displayed on the screen.
- **Voltage:** The lamp's voltage is displayed on the screen.
- **Current:** The lamp's current is displayed on the screen.
- **Power:** The lamp's power is displayed on the screen.
- **Fan Speed:** The product's fan speed is displayed on the screen.
- **Fixture Time:** The product's total running time.

Offset Mode

The Offset mode provides fine adjustments for the home position of all the moving parts in the optical path as well as the pan and tilt movements. This way, when in their home position, the moving parts do not show any border or reduce the light output.

1. Starting from the Main Level screen, press and hold **<MENU>** until the passcode screen appears.
2. Using **<UP>** to increase the number value and **<DOWN>** to move to the next column, enter **2323**, press **<ENTER>**. This brings you into the Zero Adjust menu screen.

Pan

1. Highlight **PAN**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Tilt

1. Highlight **TILT**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Dimmer

1. Highlight **DIMMER**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Color

1. Highlight **COLOR**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Gobo

1. Highlight **GOBO**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Prism 1

1. Highlight **PRISM1**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Rotating Prism 1

1. Highlight **PRISM1 ROTATE**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Prism 2

1. Highlight **PRISM2**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Rotating Prism 2

1. Highlight **PRISM2 ROTATE**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Focus

1. Highlight **FOCUS**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Frost

1. Highlight **FROST**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Mac 4

1. Highlight **MAC4**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Mac 5

1. Highlight **MAC5**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

Mac 6

1. Highlight **MAC6**, press **<ENTER>**.
2. Select **000–255**, press **<ENTER>**.

5. Technical Information

Product Maintenance

To maintain optimum performance and minimize wear, clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.

Clean this product at least twice a month. Dust build-up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

To clean the product:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Do not spin the cooling fans while blowing compressed air into them.

6. Technical Specifications

Returns

Send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags.

Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return.

Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Once you have the RMA number, provide the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
