Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

1. Before You Begin

What Is Included

- Maverick Storm 3 BeamWash
- Seetronic Powerkon IP65 power cable to bare wire
- (2) 140 D Omega brackets with mounting hardware
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate a claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
<ENTER>	A key to be pressed on the product's control panel

Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

Before You Begin

FCC Statement of Compliance

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Warning for North America and Australia

Warning! This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and the user. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- The luminaire is intended for professional use only.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 32.8 ft (10 m) is not expected.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person.
- **CAUTION:**
 - This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
 - When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.
 - Flashing light is known to trigger epileptic seizures. User must comply with local laws regarding notification of strobe use.
- **ALWAYS:**
 - Disconnect from power before cleaning the product or replacing the fuse.
 - When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.
 - Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.
 - Replace the fuse with the same type and rating.
 - Use a safety cable when mounting this product overhead.
 - Connect this product to a grounded and protected circuit.
- **DO NOT:**
 - Open this product. It contains no user-serviceable parts.
 - Look at the light source when the product is on.
 - Leave any flammable material within 200 cm of this product while operating or connected to power.
 - Connect this product to a dimmer or rheostat.
 - Operate this product if the housing, lenses, or cables appear damaged.
 - Submerge this product (adhere to standards for the published IP rating). Regular outdoor operation is fine.
 - Permanently install outdoors in locations with extreme environmental conditions. This includes, but is not limited to:
 - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
 - Locations where normal temperatures exceed the temperature ranges in this manual.
 - Locations that are prone to flooding or being buried in snow.
 - Other areas where the product will be subject to extreme radiation or caustic substances.
- **ONLY** use the hanging/mounting bracket to carry this product.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- In the event of a serious operating problem, stop using immediately.

If a Chauvet product requires service, contact Chauvet Technical Support.

2. Introduction

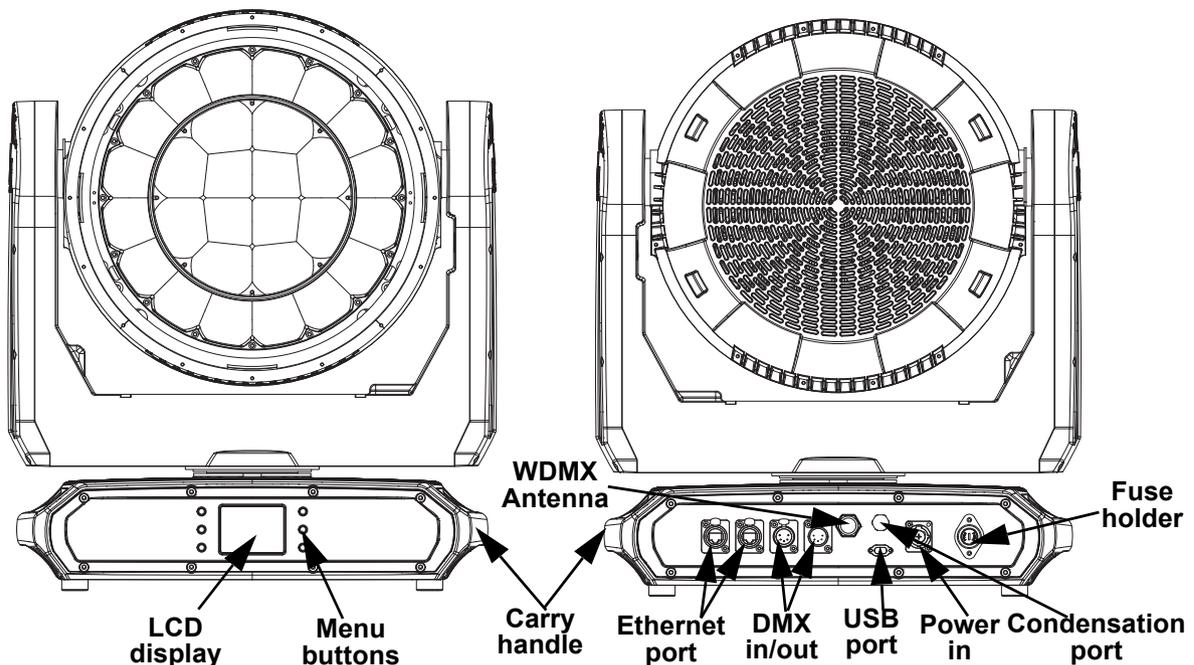

Description

Maverick Storm 3 BeamWash creates new possibilities with two zones of zoom control. Both zones independently zoom from 4.6° to 53.6° allowing for beam and wash combinations from a single fixture. A 16-lens outer zone and 12-lens inner zone combine to deliver a massive 19,062 lumens of output from 28x45W RGBW LEDs. Built-in macros with foreground and background control easily generate stunning pixel eye candy. A unique lens design delivers excellent color blending, tight aerial beam effects, and visual impact live or on camera. Dual mode operation enables pixel-mapped eye candy to run under ArtNet/sACN control with separate assignment of motorized functions to DMX. Housed in an advanced IP65-rated alloy body, Maverick Storm 3 BeamWash is built with the durability and versatility to perform in any venue, indoors or out.

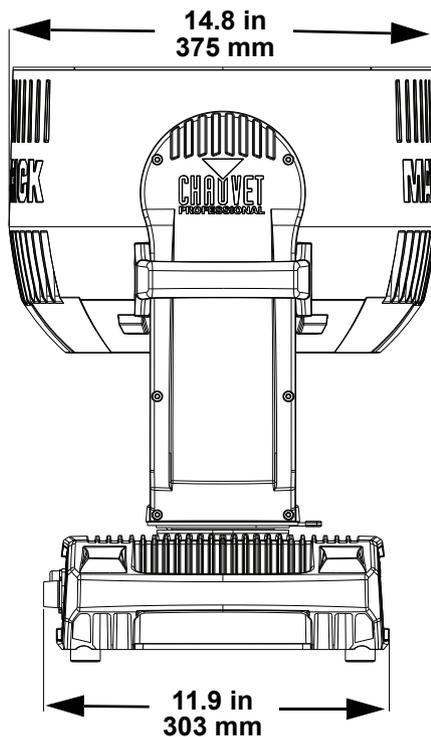

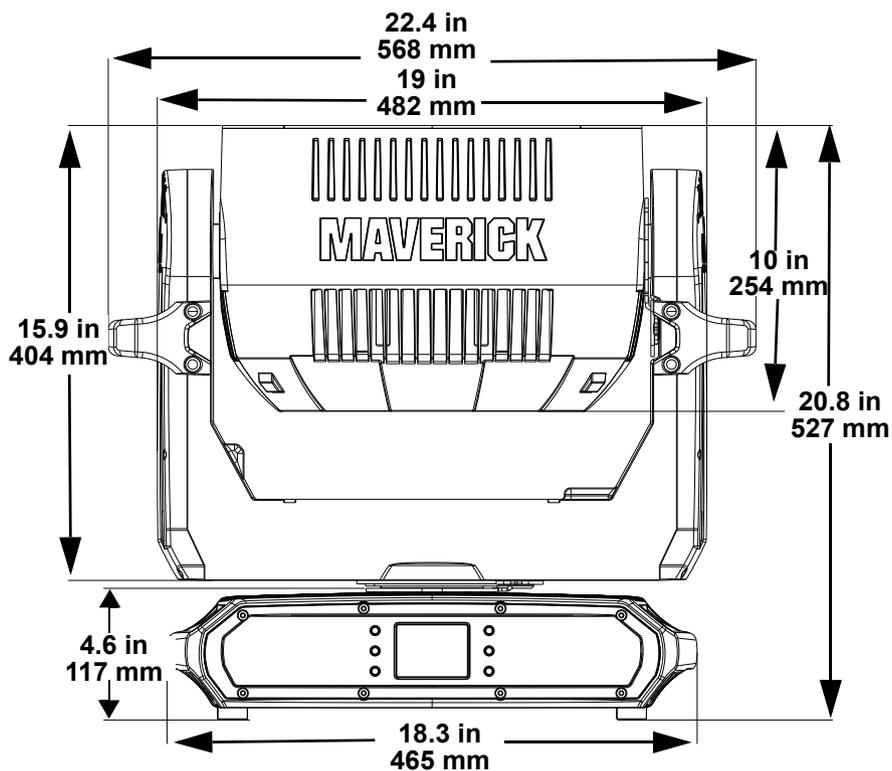

Features

- Fully-featured, compact IP65 BeamWash with (28) 45 w RGBW LEDs that zoom down to 4.6° to produce powerful, tight aerial beams and out to 53.6° for wide washes and individual pixel control for stunning eye candy effects with two independent zones of zoom control.
- 4.6° to 53.6° zoom range in both zoom zones
- Incredibly bright! Over 19,000 lumens!
- Fully pixel-mappable LEDs
- Built-in LED macros with foreground and background control for easy generation of pixel effects
- Unique lens design for excellent color blending and tight beam effects
- Fast, smooth pan and tilt movement
- User-selectable full output 7500 K calibrated white
- Selectable Pulse Width Modulation (PWM) settings for camera operation
- 6 distinct dimming modes for advanced control
- Simple and complex DMX channel profiles for programming versatility, including dual mode operation.
- 5-pin DMX and EtherCON input/output connections
- RDM enabled for remote addressing & trouble shooting
- Easy-to-read OLED display with simple, effective menu options
- USB-C port for convenient software uploads
- Removable handles on the arms make moving the fixture easy.
- Failsafe Ethernet connectivity allows for data to pass even if fixture power is lost

Product Overview

Product Dimensions

Setup

3. Setup

AC Power

The Maverick Storm 3 BeamWash has an auto-ranging power supply, and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart.

The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The Maverick Storm 3 BeamWash comes with a power input cable terminated with a Seetronic Powerkon A connector and bare end on the other end (U.S. market). Use the table below to wire a plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Power Linking

It is possible to power link Maverick Storm 3 BeamWash products. See the table below for the current draw at each voltage and frequency:

	100 V, 60 Hz	120 V, 60 Hz	208 V, 60 Hz	230 V, 50 Hz	240 V, 60 Hz
Current Draw	10.76 A	8.92 A	5.04 A	4.65 A	4.42 A

Never exceed 12A on a single circuit. Power-linking cables can be purchased separately.

Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse and replace with another fuse of the same type and rating (T25 A, 750 V).
4. Screw the fuse holder cap back in place and reconnect power.

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the Safety Notes. For our Chauvet Professional line of mounting clamps, go to <http://trusst.com/products/>.

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

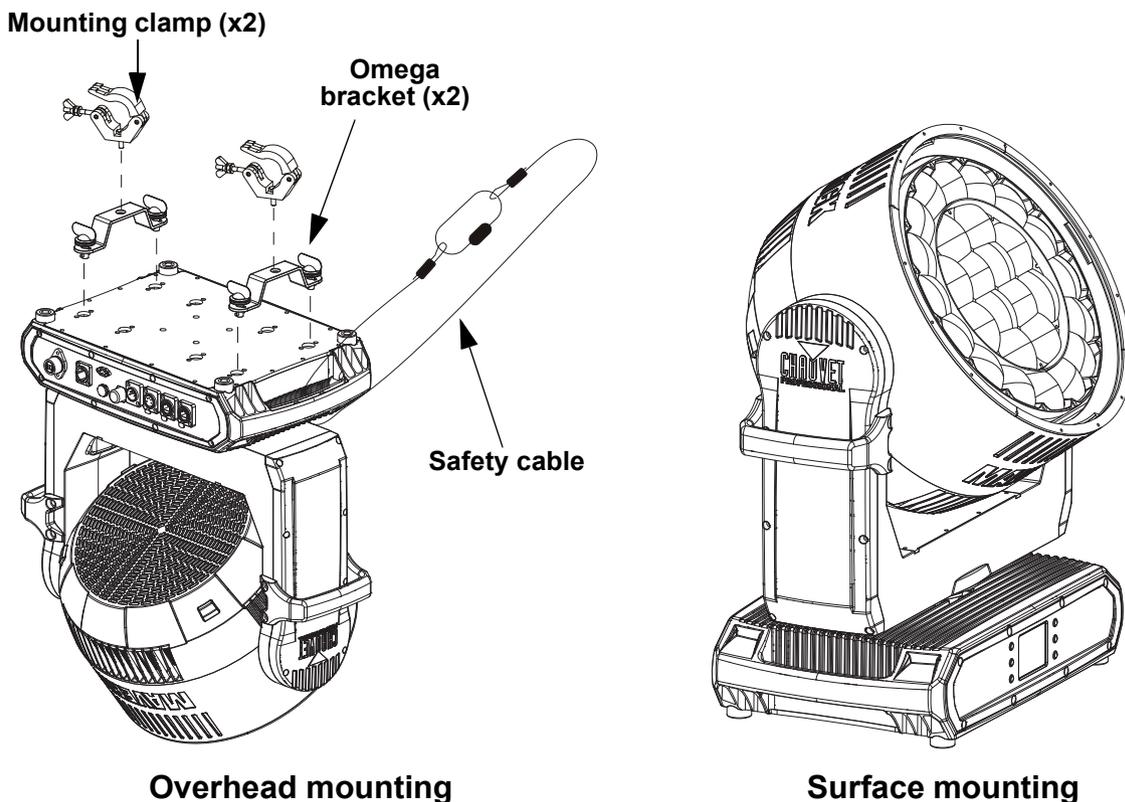

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure or surface onto which the product is being mounted can support the product's weight. See the [Technical Specifications](#).
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.

Procedure

The Maverick Storm 3 BeamWash comes with 2 omega brackets to which the user can directly attach mounting clamps (sold separately). Make sure the clamps are capable of supporting the weight of this product. Use at least two mounting points per product. For the Chauvet Professional line of mounting clamps, go to <http://www.trusst.com/products>.

Mounting Diagram

USB Software Update

The Maverick Storm 3 BeamWash allows for software update through USB using the built-in USB port. The product's USB port supports up to 32GB capacity and only works with FAT32 file format. To update the software using a USB flash drive, do the following:

1. Power on the product and plug the flash drive into the USB port.
2. Once the flash drive has been detected, the message "**Upgrade Firmware**" will be displayed. Press <ENTER>. If a different message appears on the display, search for the updated software in the main menu (**Updated Firmware**) and select from **Only This Fixture**, **Multiple Fixture**, or **Other Fixture Type**.. A list of the software update files will be displayed.
3. Select the file that needs to be uploaded. The message "**Are you sure?**" will be displayed. Press <ENTER>.
4. If the selected file is correct, the upgrade will start. DO NOT turn off the power or disconnect the USB during the process. USB update can take several minutes to complete.
5. When the update is completed, the fixture will automatically reboot.
6. Go to Fixture Information on the product's menu map and confirm the firmware revision.
7. When the boot-up process is finished, restart the product.

- If the selected file is incorrect, the update will fail, and the display will go back to the main interface. Repeat steps 1–6 using the correct file.
- Place the .chl file in the root directory of the USB drive.
- The product's USB port supports up to 32GB capacity and only works with FAT32 file format.

Signal Connections

The Maverick Storm 3 BeamWash can receive a DMX, Art-Net™, or sACN, signal. The Maverick Storm 3 BeamWash has two Amphenol XLRnet through ports and 5-pin DMX in and out ports. If using other compatible products with this product, it is possible to control each individually with a single controller.

Control Personalities

The Maverick Storm 3 BeamWash uses a 5-pin DMX data connection, WDMX, Art-Net™, Kling-Net, or sACN for its control personalities:

Single Control	Dual Control Movement	Dual Control Pixels
Basic (22-channel)	Basic (10-channel)	Basic (84-channel)
Standard (134-channel)	Standard (22-channel)	Standard (112-channel)
Advanced (252-channel)	Advanced (28-channel)	Advanced (224-channel)
Tour (308-channel)		
Basic2 (27-channel)		
Standard2 (41-channel)		
Advanced2 (323-channel)		

- Refer to the [Operation](#) chapter to learn how to configure the Maverick Storm 3 BeamWash to work in these personalities.
- The [Control Channel Assignments and Values](#) section provides detailed information regarding the control personalities.

For more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

DMX Linking

The Maverick Storm 3 BeamWash can link to a DMX controller using a 5-pin DMX connection or a WDMX connection. For more information about DMX, read the DMX primer at:

https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX_Primer.pdf.

Art-Net™ Connection

Art-Net™ is an Ethernet protocol that uses TCP/IP that transfers a large amount of DMX512 data using an Amphenol XLRnet RJ45 connection over a large network. An Art-Net™ protocol document is available from www.chauvetprofessional.com.

Art-Net™ designed by and copyright Artistic Licence Holdings Ltd.

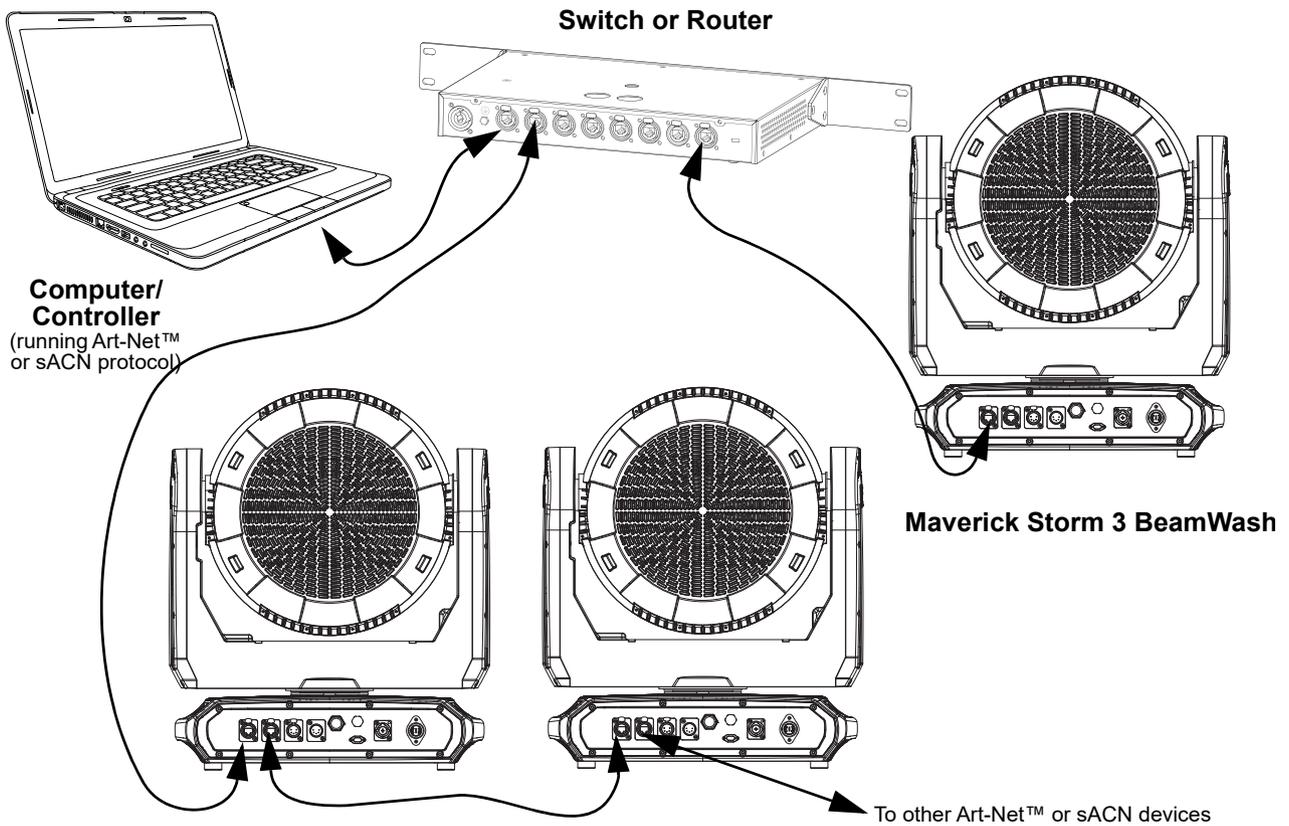

sACN Connection

Streaming ACN (Architecture for Control Networks), also known as ANSI E1.31, is an Ethernet protocol that uses the layering and formatting of ACN to transport DMX512 data over IP or any other ACN-compatible network.

Remote Device Management

Remote Device Management (RDM) is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Maverick Storm 3 BeamWash supports RDM protocol that allows feedback to make changes to menu map options.

Connection Diagram

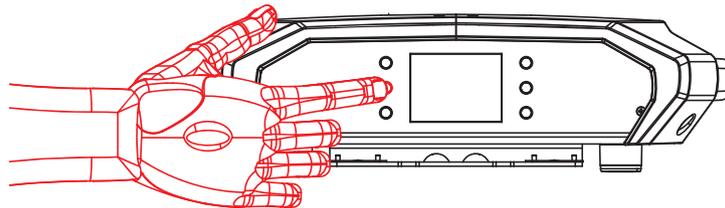

4. Operation

Control Panel Description

Button	Name	Function
	<UP>	Navigates upwards through the menu list or increases the value when in a function
	<MENU>	Exits from the current menu or function
	<DOWN>	Navigates downwards through the menu list or decreases the value when in a function
	<LEFT>	Navigates leftwards through the menu list
	<ENTER>	Enables the currently displayed menu or sets the selected value into the function
	<RIGHT>	Navigates rightwards through the menu list

Battery-Powered Display

The Maverick Storm 3 BeamWash has a battery-powered display that enables access to the menu when the product is powered off. Press and hold <MENU> until the display activates (approximately 15 seconds).

Home Screen

The Maverick Storm 3 BeamWash has a home screen that shows the current control protocols, personalities, starting addresses, IP addresses, and universes. To see the home screen, press <MENU> repeatedly until it shows on the display. From the home screen, touch any of the displayed control settings to immediately jump to that part of the menu, such as the personality, starting address, or universe, or press <ENTER> to reach the main menu.

Control Panel Lock

The setting locks or unlocks the control panel.

1. Go to the **Settings** main level.
2. Select the **Lock Screen** option.
3. Select **NO** (control panel stays unlocked) or **YES** (locks control panel).

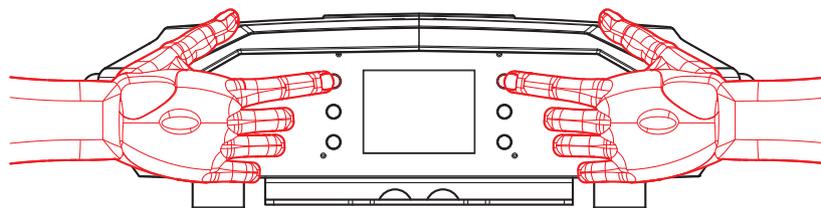

When the control panel lock is activated, the product will prompt for the passcode in order to access the menu. Enter the passcode as described below.

Passcode

After being prompted to enter the passcode, enter the numbers **0920**.

Technician Mode

The technician mode disables the pan/tilt motors, allowing the output of the product to be aimed by hand. To enable the technician mode of the Maverick Storm 3 BeamWash, hold <UP> and <LEFT> while the product is powering on. When the product is turned off and back on, the pan and tilt will return to normal function.

Menu Map

Refer to the Maverick Storm 3 BeamWash product page on www.chauvetprofessional.com for the latest menu map.

Operation

Configuration

Use control configurations to operate the product with a DMX, WDMX, Art-Net™, Kling-Net, and sACN control signals.

Control Mode

The Maverick Storm 3 BeamWash works with wired DMX, WDMX, Art-Net™, Kling-Net, and sACN control signals. To select which single control protocol to use:

1. Go to the **Control Settings** main level.
2. Select the **Single Control** option
3. Select the desired protocol, from **DMX**, **ArtNet**, **sACN**, or **WDMX**.

To select which dual control protocol to use:

1. Go to the **Control Settings** main level.
2. Select the **Dual Control** option
1. Select either **Movement** (select from **DMX**, **ArtNet**, or **sACN**) or **Pixels** (select from **DMX**, **ArtNet**, or **KlingNet**).

In Dual Control mode, the Movement protocol and the Pixels protocol cannot be the same.

- See the [WDMX Reset](#) section for further setup of WDMX.
- See the [Network Setup](#) section for further setup of ethernet protocols (Art-Net™ or sACN).

Control Personalities

To set the control personality:

1. Select the **Personality** option.
2. Select the desired personality, from:

Single Control	Dual Control Movement	Dual Control Pixels
Basic (22-channel)	Basic (10-channel)	Basic (84-channel)
Standard (134-channel)	Standard (22-channel)	Standard (112-channel)
Advanced (252-channel)	Advanced (28-channel)	Advanced (224-channel)
Tour (308-channel)		
Basic2 (27-channel)		
Standard2 (41-channel)		
Advanced2 (323-channel)		

- See the [Starting Address](#) section for the highest selectable starting address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

Each product will respond to a unique starting address from the controller. All products with the same starting address will respond in unison.

To set the starting address in Single Control mode:

1. Go to the **Address Setting** level.
2. Select the starting address (**001–512**).

Control Mode	Personality	Channels	Highest Address
Single Control	Basic	22	491
	Standard	134	379
	Advanced	252	261
	Tour	308	205
	Basic2	27	486
	Standard2	41	472
	Advanced2	323	190
Dual Control Movement	Basic	10	503
	Standard	22	491
	Advanced	28	485
Dual Control Pixels	Basic	84	429
	Standard	112	401
	Advanced	224	289

Network Setup

The Network Setup settings control the IP address, subnet mask, and universe of the product.

IP Mode

To choose how the IP address is set:

1. Go to the **Network Setting** level.
2. Select the **IP Mode** option.
3. Select the desired IP mode, from **Manual** (to set a custom IP address), **DHCP** (the IP address is assigned by the connected network), or **Static** (the product uses a default, preset IP address).

Manual IP Address

To set the IP address when the **IP Mode** is set to **Manual**:

1. Go to the **Network Setting** level.
2. Select the **Ip** option.
3. Set the 4 values of the IP address from **000–255**.

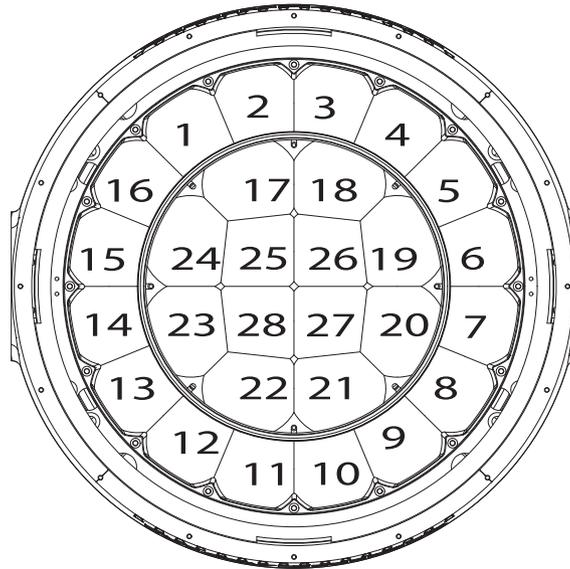

Subnet Mask

To set the subnet mask:

1. Go to the **Network Setting** level.
2. Select the **SubMask** option.
3. Set the 4 values of the subnet mask from **000–255**.

Operation

000 ⇔ 009	No function	115 ⇔ 119	Reserved for future use
010 ⇔ 014	Blackout on pan/tilt	120 ⇔ 124	Fan mode ECO
015 ⇔ 019	Reserved for future use	125 ⇔ 129	Fan mode full
020 ⇔ 024	RGBW color mixing	130 ⇔ 134	Fan mode auto
025 ⇔ 029	CMY color mixing	135 ⇔ 139	Dimmer mode fast
030 ⇔ 034	Combine main and ring	140 ⇔ 144	Dimmer mode smooth
035 ⇔ 039	Disable combine main and ring	145 ⇔ 149	Dimmer curve linear
040 ⇔ 044	Defrost fan on	150 ⇔ 154	Dimmer curve square
045 ⇔ 049	Defrost fan off	155 ⇔ 159	Dimmer curve inverse square
050 ⇔ 054	Reset pan	160 ⇔ 164	Dimmer curve S-curve
055 ⇔ 059	Reset tilt	165 ⇔ 169	WHITE mode
060 ⇔ 064	Zoom reset	170 ⇔ 174	FULL mode
065 ⇔ 066	Zoom reverse on	175 ⇔ 179	Single-color calibration off
067 ⇔ 069	Zoom reverse off	180 ⇔ 184	Single-color calibration on
070 ⇔ 074	Reset all	185 ⇔ 186	PWM 600 Hz
075 ⇔ 079	Reserved for future use	187 ⇔ 188	PWM 1200 Hz
080 ⇔ 084	Reverse pan/tilt	189 ⇔ 190	PWM 2000 Hz
085 ⇔ 089	Reverse pan	191 ⇔ 192	PWM 4000 Hz
090 ⇔ 094	Reverse tilt	193 ⇔ 194	PWM 6000 Hz
095 ⇔ 099	Disable reverse pan	195 ⇔ 196	PWM 15000 Hz
100 ⇔ 104	Disable reverse tilt	197 ⇔ 239	No function
105 ⇔ 109	Disable reverse pan/tilt	240 ⇔ 247	Calibration on
110 ⇔ 112	Preset color HTP on	248 ⇔ 255	Calibration off
113 ⇔ 114	Preset color HTP off		

Preset Color HTP

When preset color HTP is on, manual color controls may be used at the same time as preset color controls.

When preset color HTP is off, preset color controls will override all manual color controls.

Operation

Configuration

Pan Reverse

To set the orientation of the pan:

1. Go to the **Setup** main level.
2. Select the **Pan Reverse** option.
3. Select from **NO** (normal pan motion), or **YES** (reversed pan motion).

Tilt Reverse

To set the orientation of the tilt:

1. Go to the **Setup** main level.
2. Select the **Tilt Reverse** option.
3. Select from **NO** (normal tilt motion), or **YES** (reversed tilt motion).

Zoom Reverse

To set the orientation of the zoom:

1. Go to the **Setup** main level.
2. Select the **Zoom Reverse** option.
3. Select from **NO** (normal zoom), or **YES** (reversed zoom).

Screen Reverse

To set the orientation of the display:

1. Go to the **Setup** main level.
2. Select the **Screen Reverse** option.
3. Select from **NO** (right-side up), **YES** (upside-down), or **AUTO** (automatic orientation).

Pan Angle

To set the maximum angle of the pan:

1. Go to the **Setup** main level.
2. Select the **Pan Angle** option.
3. Select from **540** (540°), **360** (360°), or **180** (180°).

Tilt Angle

To set the maximum angle of the tilt:

1. Go to the **Setup** main level.
2. Select the **Tilt Angle** option.
3. Select from **260** (260°), **180** (180°), or **090** (90°).

Black out on Movement

To set the product to black out while the pan/tilt, color wheel, or gobo wheels are moving:

1. Go to the **Setup** main level.
2. Select the **BL. O. P/T Move** option.
3. Select from **NO** or **YES**.

Swap Pan and Tilt

To swap the controls for the pan and tilt:

1. Go to the **Setup** main level.
2. Select the **Swap XY** option.
3. Select from **NO** (pan controls pan, tilt controls tilt) or **YES** (pan controls tilt, tilt controls pan).

Lock Screen

To swap the controls for the pan and tilt:

1. Go to the **Setup** main level.
2. Select the **Lock Screen** option.
3. Select from **NO** or **YES**.

WDMX Reset

To reset the WDMX connection:

1. Go to the **Setup** main level.
2. Select the **WDMX Reset** option.
3. Select from **NO** or **YES**.

Display Backlight Timer

To set how long before an inactive display will turn off:

1. Go to the **Setup** main level.
2. Select the **Backlight Timer** option.
3. Select the length of the backlight timer, from **30S** (30 seconds), **1M** (1 minute), **5M** (5 minutes), or **ON** (always on).

Loss of Data

To select how the product will respond to a loss of the control signal:

1. Go to the **Setup** main level.
2. Select the **Loss of Data** option.
3. Select from **Hold** (holds last signal received) or **Close** (blacks out fixture).

Fan Speed

To set the speed of the fans:

1. Go to the **Setup** main level.
2. Select the **Fans** option.
3. Select from **Auto** (fan speed set according to product temperature), **Full** (maximum speed), or **ECO** (quiet fans mode).

Color Mixing Mode

To set the color mixing mode:

1. Go to the **Setup** main level.
2. Select the **C Mixing Mode** option.
3. Select **RGBW** (additive mode: red, green, blue, and white), or **CMY** (subtractive mode: red controls cyan, green controls magenta, blue controls yellow).

Dimmer Curve

To set the dimmer curve:

1. Go to the **Setup** main level.
2. Select the **Dimmer Curve** option.
3. Select the **Linear**, **Square**, **I Squa**, or **SCurve**.

Dimmer Speed

To set the dimmer speed:

1. Go to the **Setup** main level.
2. Select the **Dimmer speed** option.
3. Select **Smooth** or **Fast**.

Pulse Width Modulation

To adjust the frequency of the pulse width modulation:

1. Go to the **Setup** main level.
2. Select the **PWM Options** option.
3. Select **600Hz**, **1200Hz**, **2000Hz**, **4000Hz**, **6000Hz**, or **15000Hz**.

Color Balance

To set the maximum values of a given color in the mix:

1. Go to the **Setup** main level.
2. Select the **Color Balance** option.
3. Select from **Red**, **Green**, **Blue**, or **White** options.
4. Select a value from **100–255**

Calibrated White

To set the white mode:

1. Go to the **Setup** main level.
2. Select the **Calibrated White** option.
3. Select from **ON** (uses the factory-calibrated white balance), **OFF** (uses the maximum white values), or **Custom** (uses the custom white values defined under [White Balance](#))

Operation

White Balance

To set the custom white balance:

1. Go to the **Setup** main level.
2. Select the **White Balance** option.
3. Select from **Red, Green, Blue,** or **White**.
4. Select a value from **000–255**.

Merge Channel

To merge the zoom functions:

1. Go to the **Setup** main level.
2. Select the **Merge Channel** option.
1. Select from **NO** or **YES**.

Preset Select

This option saves three different preset menu option configurations. To record and set these presets, follow the instructions below:

1. Go to the **Setup** main level.
2. Select the **Preset Select** option.
3. Select from **PRESET A, PRESET B,** or **PRESET C**.
4. The product will reset. Any changes made to the menu options will be saved to this preset.
 - Default is **PRESET A**. Once changes are made inside **PRESET A**, those changes are saved to **PRESET A** without having to do anything.
 - To create a new preset, highlight and select **PRESET SELECT**. Highlight **PRESET B** or **PRESET C** and press **<ENTER>**. The product will reset automatically. Go back and make the necessary changes in the menu. This will automatically save to the present preset.

Preset Sync

To sync all menu presets to other Maverick Storm 3 BeamWashes:

1. Go to the **Setup** main level.
2. Select the **Preset Sync** option.
3. Select **NO** or **YES**.
 - To sync other Maverick Storm 3 BeamWashes, connect those products via DMX cable.
 - The product can be in any control mode except WDMX. ArtNet, DMX, sACN are all acceptable.
 - All menu options are transferred, including the DMX address. Only the IP address is not affected in the other products.

Only connect Maverick Storm 3 BeamWash.

USB Update

To enable or disable software update using USB:

1. Go to the **Setup** main level.
2. Select the **USB Update** option.
3. Select **NO** (disables software update through USB) or **YES** (enables software update through USB).

See the [Remote Device Management \(RDM\) is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Maverick Storm 3 BeamWash supports RDM protocol that allows feedback to make changes to menu map options.](#) section for the detailed instructions on how to update the Maverick Storm 3 BeamWash software using a USB C connection.

Reset function

To reset the pan, tilt, or all functions as if from startup:

1. Go to the **Settings** main level.
2. Select the **Reset Function**.
3. Select from **Pan/ Tilt, Zoom,** or **All**.
4. Select from **NO** or **YES**.

Factory Reset

To reset the product to factory settings:

1. Go to the **Settings** main level.
2. Select the **Factory Settings** option.
3. Select **NO** (to cancel) or **YES** (to reset the product configuration).

Test Mode

Auto Test

To have the Maverick Storm 3 BeamWash automatically test all functions one after the other:

1. Go to the **Test Mode** main level.
2. Select the **Auto Test** option.

Manual Test

To manually test an individual function of the Maverick Storm 3 BeamWash:

1. Go to the **Test Mode** main level.
2. Select the **Manual Test** option.
3. Select a function to test, from **Pan, Tilt, P/T Speed, Red, Green, Blue, White, CTC, Color, Pattern, LED Macro, LED Ma. Speed, LED Ma. Fade, Background, Background Dim, Dimmer, Shutter, Control, Zoom1, or Zoom2.**
4. Increase or decrease the value of the selected function from **0–255** to test it.

System Information

The information section of the menu displays statistics and the current status of the product's various functions. To view this information:

1. Go to the **System Information** main level.
2. Select from the **Fixture Information, Fan Information, Error Information, or Channel Information** options.
3. Use **<UP>** and **<DOWN>** to view all information.

Offset Mode

The Offset mode provides fine adjustments for the home position of every moving part in the optical path as well as the pan and tilt movements. To adjust these options and prevent borders showing or reduction of the light output:

1. From the main level screen, press and hold **<MENU>** until the passcode screen appears.
2. Enter the passcode: **0920** and press **<ENTER>**.
3. Select the “zero” position to adjust, from **PAN, TILT, ZOOM, MAC4, MAC5, MAC6, RDM4, RDM5, RDM6.**
4. Adjust the “zero” position for the selected function from **000–255.**

Operation

Web Server

The Maverick Storm 3 BeamWash Web Server can be accessed by any computer on the same network as the product. It allows network access to system information, settings such as control setup, manual testing of all functions, firmware updates, and the ability to change the Web Server password.

1. Connect the product to power, and set the [Control Mode](#) to **ArtNet** and the [IP Mode](#) to **Static**.
2. Connect the product to a Windows computer with a network cable.
3. On the computer, set the first value of the IP address of the new network to match the first value of the IP address of the product. The IP address of the product is displayed on the [Home Screen](#).
4. Enter the IP address of the product into the URL bar of a web browser on the computer.
5. Enter both the User Name and Password as **admin** to log in.

Information

The Information page on the Web Server displays the current settings and the system information of the Maverick Storm 3 BeamWash.

Setup

The Setup page on the Web Server provides options for control, similar to the **Setup** menu on the product. Click **Save Settings** to send the new configuration to the product.

Manual Test

The Manual Test page on the Web Server allows all output functions of the product to be controlled through the browser. To set all functions back to default, click **Reset**.

Firmware Update

The Upgrade page on the Web Server allows the product to be updated with the latest firmware. Go to <https://www.chauvetprofessional.com> to download firmware updates.

Security

The Security page on the Web Server gives the option to change the password to the connected product's web server. Enter the old password (**admin**, by default) and the new password twice, then click **Save Settings** to change the password.

5. Maintenance

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean all lighting products at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Do not spin the cooling fans with compressed air. Damage may occur.

Torque Measurements

To maintain the IP rating when reassembling the product, use the given torque measurements for each of the following screws and bolts:

- Screws inside feet: 15.3 Kgf.cm, 13.3 lgb.in
- Base screws around outside (not the feet): 53 Kgf.cm, 46 lgb.in
- Base screws in middle: 89.7 Kgf.cm, 77.8 lgb.in
- Omega bracket holder: 12.2 Kgf.cm, 10.6 lgb.in
- Front and rear base cover: 25.5 Kgf.cm, 22.1 lgb.in
- Screws around power and data ports: 35.6 Kgf.cm, 30 lgb.in
- Fuse: 10.7 Kgf.cm, 9.2 lgb.in
- Center of yoke plate: 25.5 Kgf.cm, 22.1 lgb.in
- Arm cover screws: 25.5 Kgf.cm, 22.1 lgb.in
- Allen Key screws holding in front lens cover: 15.2 Kgf.cm, 13.2 lgb.in
- Allen Key screws next to heat pipes on the back: 20.3 Kgf.cm, 17.7 lgb.in
- Allen Key screws head covers: 25.5 Kgf.cm, 22.1 lgb.in

Vacuum Test Measurements

To ensure that the product has been reassembled correctly, use the IP Tester from Chauvet Professional to check the following data has the given measurements for the given method:

- Method: Positive
- Test Pressure (kPa): 2.18
- Test Duration (seconds): 60
- PASS State leak pressure (kPa): <0.02
