

WELL PANEL X

WIRELESS EVENT LED LUMINAIRE

User Manual

Model ID: WELLPANELXX4

Edition Notes

The WELL Panel X X4 User Manual includes a description, safety precautions, installation, programming, operation, and maintenance instructions for the WELL Panel X X4 as of the release date of this edition.

Trademarks

Chauvet, Chauvet Professional, the Chauvet logo, WELL and WELL Panel are registered trademarks or trademarks of Chauvet & Sons, LLC (d/b/a Chauvet and Chauvet Lighting) in the United States and other countries. Other company and product names and logos referred to herein may be trademarks of their respective companies.

Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage, or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident, or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision. However, Chauvet has no obligation to make, and does not commit to make, any such revisions.

Before You Begin

1. Before You Begin

What Is Included

- WELL Panel X X4
- Charging case
- RF Controller
- 4 Seetronic Powerkon IP65 power cable
- 4 omega brackets with mounting hardware
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate a claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
<ENTER>	A key to be pressed on the product's control panel

Symbols

Symbol	Meaning
	Electrical warning. Not following these instructions may cause electrical damage to the product, accessories, or the user.
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Pinch point warning. Not following these instructions may result in damage to, or loss of, tools, digits, or limbs.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

Connection of the control signal: DMX line

- The product has XLR sockets for DMX input and output.
- **Notice:** This control circuit is isolated and belongs to the Class 2 data port. The control circuit has a cumulative leakage current of less than 3.5 mA.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- The luminaire is intended for professional use only.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 1.64 ft (0.5 m) is not expected.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person.
- **CAUTION:**
 - This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
 - When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.
 - Flashing light is known to trigger epileptic seizures. User must comply with local laws regarding notification of strobe use.
- **ALWAYS:**
 - Disconnect from power before cleaning the product or replacing the fuse.
 - When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.
 - Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.
 - Replace the fuse with the same type and rating.
 - Use a safety cable when mounting this product overhead.
 - Connect this product to a grounded and protected circuit.
- **DO NOT:**
 - Open this product. It contains no user-serviceable parts.
 - Look at the light source when the product is on.
 - Leave any flammable material within 50 cm of this product while operating or connected to power.
 - Connect this product to a dimmer or rheostat.
 - Operate this product if the housing, lenses, or cables appear damaged.
 - Submerge this product (adhere to standards for the published IP rating). Regular outdoor operation is fine.
 - Permanently install outdoors in locations with extreme environmental conditions. This includes, but is not limited to:
 - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
 - Locations where normal temperatures exceed the temperature ranges in this manual.
 - Locations that are prone to flooding or being buried in snow.
 - Other areas where the product will be subject to extreme radiation or caustic substances.
 - ONLY use the hanging/mounting bracket to carry this product.
 - The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
 - The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
 - The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
 - To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
 - In the event of a serious operating problem, stop using immediately.

If this Chauvet product requires service, contact Chauvet Technical Support.

Battery Charge Notes

Rechargeable lithium-ion batteries are potentially hazardous and can present a serious FIRE HAZARD, SERIOUS INJURY, and/or PROPERTY DAMAGE if damaged, defective, or improperly used.

- **ALWAYS:**

- Charge using a manufacturer-provided charger while the product is powered off.
- Charge the battery in temperatures between 32°–95°F (0°–35°C).
- Allow a depleted battery to charge for a few minutes before turning on the product. If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected.
- Keep at least 3 ft (1 m) distance to any heat source and away from flammable materials.
- Keep batteries away from children.
- Store batteries between 40–60% charge.
- Follow local regulations when disposing of batteries.
- Replace with an authentic Chauvet battery.

- **DO NOT:**

- Continue charging if the battery becomes hot, smokes, swells, or gives off an odor during charging.
- Leave the product unattended while charging.
- Deplete the battery below 10%.
- Charge for more than 24 hours.

CAUTION! Fixture must be powered off before placing in the case!

- Leaving the product powered on while charging in a closed case may lead to damage.
- In the event a WELL Panel X X4 fixture remains powered on when plugged in to the charging case, and the case is closed, the battery charge indicators will flash on and off as a warning.

Storage Notes

Follow the instructions below when storing the WELL Panel X X4:

- Store charged product(s) in a dry environment, away from direct sunlight.
- Charge or discharge the battery to approximately 50% of capacity before storage.
- Lithium-ion batteries continue to slowly discharge (self-discharge) when not in use or while in storage. Routinely check the battery's charge status.
- Store the battery at temperatures between 41 °F and 68 °F (5 °C and 20 °C).

FCC Statement of Compliance

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Warning for North America and Australia

Warning! This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and the user. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

2. Introduction

Features

- A fully realized kit of (4) battery operated black IP65-rated panel style fixtures, with (40) RGB warm white LEDs and a beam angle of 10.8 degrees
- Battery run time selections of 5, 8, 12, and 18 hours of operation at full output
- Built-in battery charger allows fixture to operate while charging
- Built-in IP65 5-pin DMX in/out allows for wired data
- Built-in Seetronic IP65 PowerKon input/output
- Control over DMX, CRMX, RDM, or RF
- Easy connection to WELL COM and WELL COM 2 boxes for app control
- Pressure equalizing M12 Gore valve
- Built-in safety cable attachment point
- Easy-to-read OLED display
- Built-in PWM adjustment
- Included RF remote
- Included 4 pack charging case

5	Battery charge indicators

Charging Case Dimensions

3. Setup

AC Power

The WELL Panel X X4 and the included charging case have auto-ranging power supplies and they can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart.

The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Ensure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The WELL Panel X X4 comes with a power input cable terminated with a Seetronic Powerkon A connector on one end and an Edison plug on the other end (U.S. market). If the power cable which came with the product has no plug, or if it is necessary to change the plug, use the table below to wire a plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse and replace with another fuse of the same type and rating (T 6.3 A, 250 V).
4. Screw the fuse holder cap back in place and reconnect power.

Power Linking

It is possible to power link WELL Panel X X4 products. See the table below for the current draw at each voltage and frequency:

WELL Panel X	100 V, 60 Hz	120 V, 60 Hz	208 V, 60 Hz	230 V, 50 Hz	240 V, 50 Hz
Current Draw	1.18 A	.99 A	0.56 A	0.51 A	0.49 A
Charging Case	100 V, 60 Hz	120 V, 60 Hz	208 V, 60 Hz	230 V, 50 Hz	240 V, 50 Hz
Current Draw	5.62 A	4.60 A	2.62 A	2.31 A	2.20 A

Never exceed 12 A on a single circuit. Power-linking cables can be purchased separately.

DMX Linking

The WELL Panel X X4 can be linked to a DMX controller using a 5-pin DMX connection or a Lumenradio CRMX™ connection. If using other DMX-compatible products with this product, it's possible to control each individually with a single DMX controller.

DMX Personalities

The WELL Panel X X4 uses a 5-pin DMX data connection or a wireless CRMX™ connection for its 5 DMX personalities, ranging from **5 Ch** to **16 Ch**.

- Refer to the [Operation](#) chapter to learn how to configure the WELL Panel X X4 to work in these personalities.
- The [DMX Channel Assignments and Values](#) section provides detailed information regarding the DMX personalities.

For information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

Remote Device Management

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer as not all DMX controllers have this capability. The WELL Panel X X4 supports RDM protocol that allows feedback to make changes to menu map options.

Master/Slave Connectivity

The Master/Slave mode allows an WELL Panel X X4 (the master) to control one or more WELL Panel X X4 products (the slaves) without a DMX controller. One WELL Panel X X4 becomes the master when running an auto program or in Static mode.

Each slave's control panel must be configured to operate in Slave mode. During Master/Slave operation, the slaves will operate in unison with the master.

DO NOT connect a DMX controller to products operating in Master/Slave mode. The DMX controller signals may interfere with the signals from the master.

- The [Operation](#) section of this manual provides detailed instructions on how to configure the master and slaves.
- For more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX primer from the Chauvet website: www.chauvetprofessional.com.

Lumenradio CRMX™ Connection

In optimal conditions, the WELL Panel X X4 can operate up to 300 m (900 ft) away from the CRMX™ transmitter. The CRMX™ receiver in the WELL Panel X X4 must be paired with the CRMX™ transmitter for wireless operation.

To operate the WELL Panel X X4 as a CRMX™ receiver, see [Receiver Configuration](#).

To operate the WELL Panel X X4 as a CRMX™ transmitter, see [Transmitter Configuration](#).

Receiver Configuration

1. Turn the CRMX™ transmitter on.
2. Connect the CRMX™ transmitter to a DMX controller.
3. Place the WELL Panel X X4 within 300 m from the CRMX™ transmitter.
4. Turn the WELL Panel X X4 on.
5. From the WELL Panel X X4's control panel, go to **DMX Address**.
6. Select the starting address, as with any other DMX compatible product.
7. Go to **Wireless Setting > W-DMX On/Off**.
8. Select **On**. (The Signal Strength Indicator will show a ? in front of the bars)
9. Go to **Wireless Setting > Operating Mode**.
10. Select **Receive**. (The **Receive Reset** option will become available)
11. Press the reset button on the CRMX™ transmitter. (The signal strength indicator on the WELL Panel X X4 will show a 4 in front of the bars for 3 seconds while a connection is established.)

Product Pairing

If the WELL Panel X X4 has already been paired with the CRMX™ transmitter, the signal strength indicator on top of the display will show the strength of the signal. In this case, the WELL Panel X X4 is ready to work in Wireless mode.

Pairing the WELL Panel X X4 and a New CRMX™ Transmitter

1. Follow the instructions under [Receiver Configuration](#) to set a WELL Panel X X4 product up as a receiving WELL Panel X X4.
2. From the WELL Panel X X4 control panel, go to **Wireless Setting > Receive Reset**.
3. Select **Yes**.
4. From the CRMX™ transmitter, press **<RESET>**. The signal indicator on the transmitter will flash.
5. Once the transmitter has found the WELL Panel X X4, the signal indicator on the CRMX™ transmitter will illuminate solid.
6. The display screen on the WELL Panel X X4 will show the strength of the signal.

CRMX™ operation can be interrupted or inhibited by people or liquid masses, including water or snow, between the transmitter and receiver. For best results, keep the area between the transmitter and receiver clear of any liquid masses.

Transmitter Configuration

The WELL Panel X X4 can operate as a CRMX™ transmitter for master/slave mode.

1. From the WELL Panel X X4's control panel, go to **DMX Address**.
2. Select the starting address, as with any other DMX compatible product.
3. Go to **Wireless Setting > W-DMX On/Off**.
4. Select **On**. (The signal strength indicator will show a ? in front of the bars)
5. Go to **Wireless Setting > Operating Mode**.
6. Select **Transmit**. (The **Link** option will become available)

Product Linking

If the WELL Panel X X4 has already been linked to a receiving product, the signal strength indicator on top of the display will show the strength of the signal. In this case, the WELL Panel X X4 is ready to work in wireless mode.

Linking WELL Panel X X4 products with CRMX™

1. Follow the instructions under [Receiver Configuration](#) and set up a WELL Panel X X4 product as a receiving WELL Panel X X4.
2. Follow the instructions under [Transmitter Configuration](#) and set up a WELL Panel X X4 product as a transmitting WELL Panel X X4.
3. From the control panel of the transmitting WELL Panel X X4, go to **Wireless Setting > Link**.
4. If the transmitting WELL Panel X X4 has already been linked to a receiving product and it is necessary to link it to a new receiving product, select **Unlink**.
5. If necessary, return to **Wireless Setting > Link**.
6. Select **Link**.
1. From the control panel of the receiving WELL Panel X X4, go to **Wireless Setting > Receive Reset**.
2. Select **Yes**.
3. Once the transmitter has found the receiver, the signal indicator on the transmitter will illuminate solid.
4. The display screen on each WELL Panel X X4 will show the strength of the signal.

CRMX™ operation can be interrupted or inhibited by people or liquid masses, including water or snow, between the transmitter and receiver. For best results, keep the area between the transmitter and receiver clear of any liquid masses.

Software Update

- **A Software Update process requires a target fixture (the fixture that needs the Software Update) and a main fixture (the fixture that controls the update process).**
- **The Software Update process can only be done one target fixture at a time.**

To do a Software Update, follow the instructions below:

1. Link the target fixture to the main fixture via a DMX 5-pin connection. Ensure that the target fixture is turned off.
2. Turn on the main fixture and set its protocol to **DMX512**.
3. Plug the flash drive into the USB-C port of the main fixture.
4. Go to Upgrade Firmware option on the menu map.
5. Choose between **Multiple Fixture** and **Other Fixture Type**. Press **<ENTER>**.
 - **Multiple Fixture:** Both the target fixture and main fixture are from the same product line (e.g., 2 WELL Panel X fixtures).
 - **Other Fixture Type:** The target fixture and main fixture are from different product series (e.g., a WELL Panel X as the target fixture and a Maverick Silens 2 Profile as the main fixture).
6. Select the file that needs to be uploaded. The message **"Are you sure?"** will appear on the screen. Press **<ENTER>**. Turn on the target fixture within 1–2 seconds of pressing **<ENTER>**. The display on the target fixture should remain off.
 - a. The main fixture will show the update progress (0–100%).
 - b. The target fixture's display will turn on, and a notification **"<UPDATE>"** will appear on the screen.

- **The "Other Fixture Type" option under Upgrade Firmware can only be selected for connected products compatible with the Upload 03 (the first 2 digits of the item code must be 03).**

The WELL Panel X software can also be updated using the Upload 03 firmware update device by connecting the device directly to the product's DMX IN port. For further instructions on how to update firmware using Upload 03, see [03 Upload Rev2 2.pdf](#)

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#).

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure and attachment points can support the weight before hanging the product (see the [Technical Specifications](#) for weight information).
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power-linking cables to reach.
- The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

Procedure

The WELL Panel X X4 comes with Omega brackets. The user can directly attach mounting clamps (sold separately) to these Omega brackets. Make sure the clamps are capable of supporting the weight of this product. For the Chauvet Professional line of mounting clamps, go to <http://www.trusst.com/products>.

Mounting Diagram

4. Operation

Control Panel Description

Button	Function
<Mode>	Exits from the current menu or function
<Enter>	Enables the currently displayed menu or sets the selected value into the selected function
<Up>	Navigates upwards through the menu list or increases the numeric value when in a function
<Down>	Navigates downwards through the menu list or decreases the value when in a function

Control Options

Set the WELL Panel X X4 starting address in the **001-508** DMX range. This enables control of up to 102 products in the 5-channel **5 Ch** personality.

Programming

Refer to the menu map to understand the menu options. The menu map shows the main menu and a variable number of programming levels for each option.

- To access the main menu, press **<Mode>**.
- To access the main menu from the Home Screen, press **<Mode>**.
- To navigate to the desired option in the main menu, press **<Mode>** repeatedly until the option is indicated, or use **<Up>** or **<Down>** to navigate directly.
- Press **<Enter>** to select the indicated option.
- Use **<Up>** or **<Down>** to navigate within a programming level until the desired option is indicated.
- To return to the main menu, press **<Mode>** repeatedly until it shows on the display.
- Press and hold **<Mode>** to return to the home screen.

Home Screen

The WELL Panel X X4 has a home screen that shows the current operating mode, DMX personality, starting address, product temperature, signal strength, and battery life. To see the home screen, press and hold **<Mode>** until it shows on the display. From the home screen, press **<Mode>** to reach the main menu.

Control Panel Lock

The setting locks or unlocks the control panel.

1. Go to the **Password** main level.
2. Select **On** (locks control panel) or **Off** (control panel stays unlocked).

When the control panel lock is activated, the product will prompt for the password in order to access the menu. Enter the password as described below.

Password

When prompted, enter the following password: **<Up>**, **<Down>**, **<Up>**, **<Down>**, **<Enter>**. It is not possible to change this password.

Menu Map

Refer to the WELL Panel X X4 product page on www.chauvetprofessional.com for the latest menu map.

Main Level	Programming Levels			Description

	4000Hz			
	6000Hz			
	25KHz			
Wireless Setting	W-DMX On/Off		On	Enables/disables wireless DMX
			Off	
	Operating Mode		Receive	Sets fixture as a receiver
			Transmit	Sets fixture as a transmitter
	Link		Link	Links with a receiver
			Unlink	Unlinks with a linked receiver
Receive Reset		No	Resets the wireless receiver to reset the link with the transmitter or to link with a new transmitter	
		Yes		
Power Loss Mode	Stay In State			If line power is lost, the fixture will continue to function as programmed under battery power (default)
	All At Full			After 5 seconds of line power loss, all LEDs will go to full power (returns to normal operation when line power is restored)
	Dim Out			After 5 seconds of line power loss, the LEDs will dim in a 10 second fade to black (returns to normal operation when line power is restored)
RF Setting	Off			Turns off RF reception
	Link			Links the fixture to a single RF controller
	Public			Allows the fixture to respond to all RF signals
	Group	Group 1–4		Assigns a group for RF control
Run Time	Off			Maximum intensity for all LEDs
	5 Hours			Reduced intensity, limiting battery run time to 5 hours
	8 Hours			Reduced intensity, limiting battery run time to 8 hours
	12 Hours			Reduced intensity, limiting battery run time to 12 hours
	18 Hours			Extends battery to the maximum run time of 18 hours
Back Light	10S			Turns off display backlight after 10 seconds of inactivity
	30S			Turns off display backlight after 30 seconds of inactivity
	2Min			Turns off display backlight after 2 minutes of inactivity
	Always On			Display backlight always on
Password	On			Locks display (password is <Up>, <Down>, <Up>, <Down>, <Enter>)
	Off			

Operation

Main Level	Programming Levels		Description
Information	Fixture Hours	<_ _ _ _H>	Shows total hours the product has been powered on
	LED Hours	<_ _ _ _H>	Shows total hours the LEDs have been powered on
	Version	<V1.0.1.2>	Shows current firmware version
	UID	<_ _ _ _ _>	Shows product UID
Factory Reset	No		Resets the product to factory default settings
	Yes		

DMX Configuration

Use control configurations to operate the product with a DMX controller.

DMX Personalities

To set the DMX personality:

1. Go to the **DMX Channel** main level.
2. Select the desired personality, from **5 Ch**, **8 Ch**, **9 Ch**, **12 Ch**, or **16 Ch**.

- See the [Starting Address](#) section for the highest selectable starting address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

Each product will respond to a unique starting address from the controller. All products with the same starting address will respond in unison. To set the starting address in DMX mode:

1. Go to the **DMX Address** main level.
2. Select the starting address (**001–512**).

Personality	Highest Address	Products per Universe
5 Ch	509	102
8 Ch	505	64
9 Ch	504	56
12 Ch	501	42
16 Ch	497	32

Standalone Configuration

Static Mode

The static mode options include fixed colors, preset color temperatures, and a manual color mixer.

Fixed Color

To select a fixed color:

1. Go to the **Static** main level.
2. Select the **Virtual Color Wheel** option.
3. Select the desired color combination (**R**, **G**, **B**, **W**, **GB**, **RB**, **RG**, **RGB**, **RW**, **GW**, **BW**, **RGW**, **RBW**, **GBW**, or **RGBW**).
4. Set the **Dimmer** value (**0–255**).

Color Temperature

To select a preset color temperature via the menu map:

1. Go to the **Static** main level.
2. Select the **Color Temperature** option.
3. Select the desired color temperature (**2800K**, **3200K**, **3500K**, **4000K**, **4500K**, **5000K**, **5600K**, **6000K**, or **6500K**). See the [Color Temperature Chart](#).
4. Set the **Dimmer** value (**0–255**).

Manual Color Mixer

To manually mix a custom static color:

1. Go to the **Static** main level.
2. Select **Manual Color Mixer**.
3. Select the color to edit (**Red**, **Green**, **Blue**, or **White**).
4. Set the value for the selected color (**000–255**).
5. Repeat steps 3 and 4 until product outputs as desired.

Auto Show

To select an automatic program:

1. Go to the **Auto Show** main level.
2. Select the desired auto program (**Auto 1–9**).
3. Set the **Speed** value (**001–100**).

Settings Configuration

Master/Slave

To set the WELL Panel X X4 product to master or slave mode:

1. Go to the **Master/Slave** main level.
2. Select from **Master** (sends control signal) or **Slave** (receives control signal).

- **Configure all the slave products before connecting the master to the daisy chain.**
- **Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master.**
- **Do not connect more than 31 slaves to the master.**

Dimmer Curve

To set the dimmer curve:

1. Go to the **Dimmer Curve** main level.
2. Select from **S Curve**, **Linear**, **Square**, or **Inverse Square**.

Dimmer Speed Mode

To set the dimmer speed:

1. Go to the **Dimmer Mode** main level.
2. Select the dimmer speed mode from **Off** (instant), **Dimmer 1** (fastest), **Dimmer 2**, or **Dimmer 3** (slowest).

Operation

White Balance

To configure the white balance:

1. Go to the **White Balance** main level.
2. Select from **Off** or **Manual**.
3. If **Manual**, select the maximum color value to edit (**Red**, **Green**, **Blue**, or **White**).
4. Set the maximum level for the selected color (**125–255**).
5. Repeat steps 3–4 until the colors are calibrated as desired.

Pulse Width Modulation

To set the frequency of the pulse width modulation:

1. Go to the **LED Frequency** main level.
2. Select the PWM frequency (**1000Hz**, **2000Hz**, **3000Hz**, **4000Hz**, **6000Hz**, or **25KHz**).

Power Loss Mode

To set how the product will respond to a line power loss.

1. Go to the **Power Loss Mode** main level.
2. Select from the **Stay in State** (the fixture will continue to function as programmed under battery power), **All at Full** (all LEDs will go to full power after 5 seconds of line power loss, and return to normal operation when line power is restored), or **Dim Out** (all LEDs will dim in a 10 second fade to black, and return to normal operation when line power is restored) options.

Run Time Mode

To select an operation mode which balances output intensity with battery run time:

1. Go to the **Run Time** main level.
2. Select from the **5 Hours**, **8 Hours**, **12 Hours** (increases or reduces the intensity, limiting the battery run time to 5, 8, or 12 hours), or **18 Hours** (extends the battery life to the maximum run time of 18 hours) options.

Display Backlight

To set how long the display will stay lit without activity:

1. Go to the **Back Light** main level.
2. Select from **10S** (10 seconds), **30S** (30 seconds), **2Min** (2 minutes), or **Always On**.

Information

To view product information, such as the number of hours the product has been on, the driver firmware, etc., go to the **Information** main level.

Factory Reset

To reset the product to factory default settings:

1. Go to the **Factory Reset** main level.
2. Select **No** (do not reset) or **Yes** (reset).

Radio Frequency Configuration

RF Setting

To configure the product for radio frequency control:

1. Go to the **RF Setting** main level.
2. Select from the **Off** (disables RF control reception), **Link** (highlight without pressing **<Enter>** to enable linking with a single controller), **Public** (enables control by all RF signals), or **Group** (to assign this fixture to a group for RF control) option.
3. For:
 - **Link**: DO NOT press **<ENTER>**. Highlight the **Link** option, and press and hold **<Blackout>** on the RF Controller until the WELL Panel X X4 display shows **RF Connected** or **RF Disconnected**.
 - **Group**: assign the product to the desired group, from **Group 1–4**.

RF Controller Operation

RFC	Button	Function
	<BLACK OUT>	Press to turn off all lights. Press Auto, Manual, or any color to turn back on.
	<STROBE>	Press to toggle strobe, then use <+> or <-> to increase or decrease strobe speed
	<DIMMER>	Press then use <+> or <-> to increase or decrease the dimmer
	<AUTO>	Press to activate automatic mode, then use <+> or <-> to select a program
	<SPEED>	Press then use <+> or <-> to increase or decrease speed
	<CRMX>	Press and hold for 5 seconds to reset CRMX™ receiver
	<->	Press to decrease speed, sensitivity, or the dimmer/color value, or to scroll down the list of programs
	<+>	Press to increase speed, sensitivity, or the dimmer/color value, or to scroll up the list of programs
	<FREEZE>	Press to stop all movement and color chasing
	<R>	In manual mode, press then use <+> or <-> to increase or decrease the red value
	<G>	In manual mode, press then use <+> or <-> to increase or decrease the green value
		In manual mode, press then use <+> or <-> to increase or decrease the blue value
	<W>	In manual mode, press then use <+> or <-> to increase or decrease the white value
	<FADE/SNAP>	Press to activate automatic mode, then use <+> or <-> to select a program
	<MANUAL>	Press to activate manual mode, the press to cycle through colors
	<PRESET/COLOR>	Press to activate fixed colors then use <+> or <-> to select a color

The RFC remote will not respond to any inputs when Freeze or Black Out is activated. If the remote does not respond when a button is pressed, try pressing **<FREEZE>** or **<BLACK OUT>**. Freeze or Black Out may have been inadvertently activated.

Error Codes

See the table below for error codes and recommended solutions:

Error Code	Possible Reason	Potential Solution
Temperature shows -40°C	The thermistor is not welded properly	Repair or replace the thermistor PCB
	The temperature control wire is disconnected or has a poor connection	Check the wire connection
Temperature shows 128°C	The thermistor is not welded properly	Repair or replace the thermistor PCB
	The temperature control connector has a short circuit	Check the wire connector

5. Maintenance

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean each lighting product at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Torque Measurements

To maintain the IP rating when reassembling the product, use the given torque measurements for each of the following screws and bolts:

Fixture Parts	Torque Rating (Kgf.cm)	Torque Rating (lbf.in)
Rear cover	12	10.41554
Top cover	10	8.67916

Vacuum Test Measurements

Use the IP Tester from Chauvet Professional to ensure the product has been reassembled correctly by following the information below:

Parameters	Values
Method	Positive
Test pressure	40 kPa
Test duration	30 seconds
PASS state leak pressure	<0.5 kPa

6. Technical Specifications

Dimensions and Weight

Parameter	Length	Width	Height	Weight
