Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage, or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident, or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision. However, Chauvet has no obligation to make, and does not commit to make, any such revisions.

1. Before You Begin

What Is Included

- ÉPIX LINE 10 IP S
- Interlocking bracket
- Milky white square filter (installed)
- Black stealth square filter (included)
- Milky white round filter (included)
- Mounting bracket (installed)
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate a claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
<ENTER>	A key to be pressed on the product's control panel

Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- The luminaire is intended for professional use only.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 7.5 ft (2.3 m) is not expected.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person.
- **CAUTION:**
 - This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
 - When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.
 - Flashing light is known to trigger epileptic seizures. User must comply with local laws regarding notification of strobe use.
- **ALWAYS:**
 - Disconnect from power before cleaning the product.
 - When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.
 - Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.
 - Use a safety cable when mounting this product overhead.
 - Connect the ÉPIX D4 IP to a grounded and protected circuit.
- **DO NOT:**
 - Open this product. It contains no user-serviceable parts.
 - Look at the light source when the product is on.
 - Leave any flammable material within 50 cm of this product while operating or connected to power.
 - Connect this product to a dimmer or rheostat.
 - Operate this product if the housing or cables appear damaged.
 - Submerge this product (adhere to standards for the published IP rating). Regular outdoor operation is fine.
 - Permanently install outdoors in locations with extreme environmental conditions. This includes, but is not limited to:
 - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
 - Locations where normal temperatures exceed the temperature ranges in this manual.
 - Locations that are prone to flooding or being buried in snow.
 - Other areas where the product will be subject to extreme radiation or caustic substances.
 - **ONLY** use the hanging/mounting bracket to carry this product.
 - The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
 - The minimum ambient temperature is -4°F (-20°C). Do not operate the product at lower temperatures.
 - To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the ÉPIX D4 IP from power via breaker or by unplugging it.
 - In the event of a serious operating problem, stop using immediately.

If this Chauvet product requires service, contact Chauvet Technical Support.

FCC Statement of Compliance

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Expected LED Lifespan

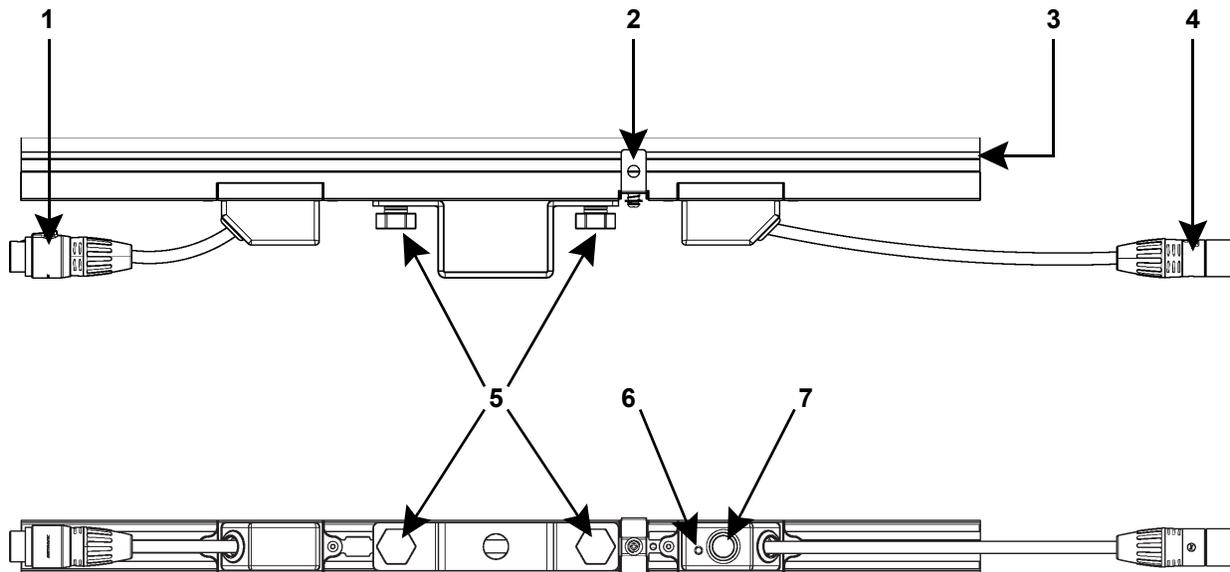

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

2. Introduction

Features

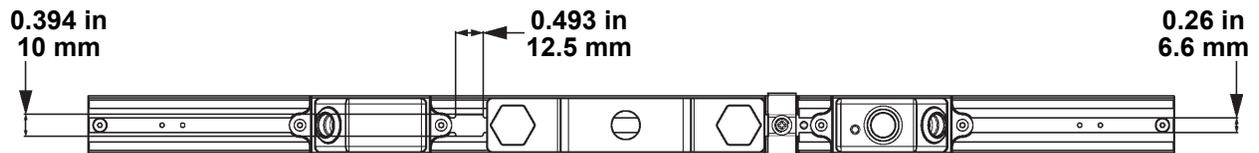

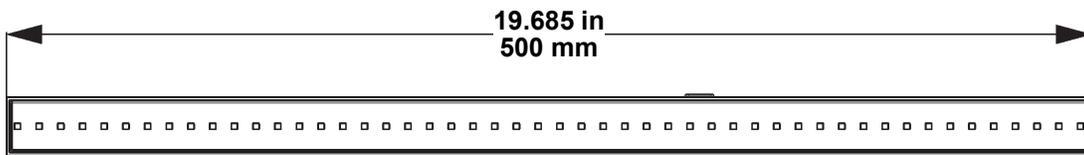

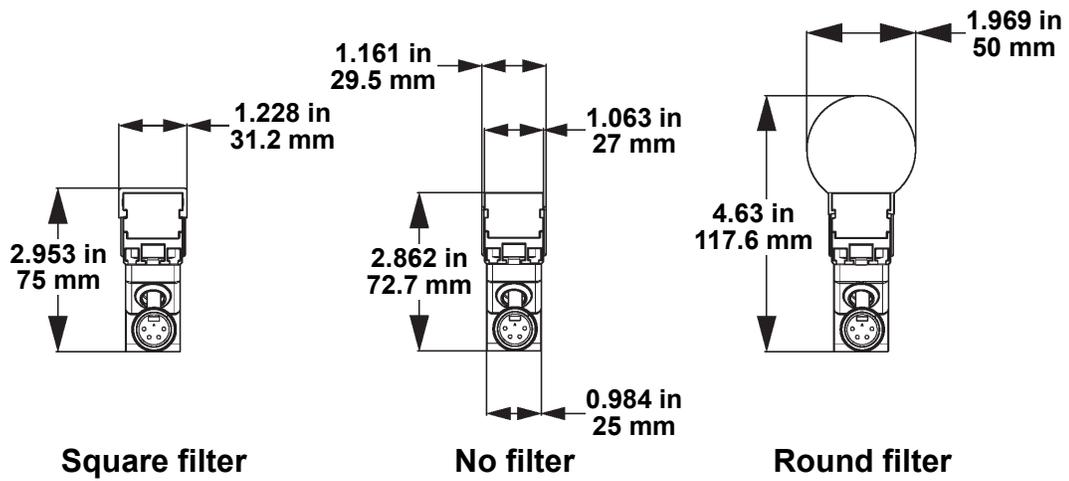

- Linear LED strip with 10 mm pixel pitch delivers vivid, wide-gamut RGB color for dynamic architectural and entertainment applications
- Standard 4-pin XLR connectors and three included optical filters support multiple use cases, including wide viewing angles
- Slim form factor simplifies integration into tight spaces, while full repairability ensures long-term reliability and lower service costs
- Native compatibility with the ÉPIX Mapping System and MVR (My Virtual Rig) support makes configuration fast and intuitive

Product Dimensions

3. Setup

DC Power

The ÉPIX LINE 10 IP S has a 4-pin IP65 XLR power input that can work with an input voltage of 48 VDC, 11 W (STANDARD) or 16 W (HI OUTPUT) from the ÉPIX D4 IP.

- Use **ONLY IP65 4-pin XLR cables with the ÉPIX LINE 10 IP S.** For the Chauvet Professional line of IP65 4-pin XLR cables, go to <https://www.chauvetprofessional.com/accessories>.
- Always connect the ÉPIX D4 IP to a protected circuit (a circuit breaker or fuse). Ensure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the ÉPIX D4 IP from power via breaker or by unplugging it.

Never connect the ÉPIX D4 IP to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

Power Linking

It is possible to link up to 20 ÉPIX LINE 10 IP S products from each port of the ÉPIX D4 IP in STANDARD mode.

It is possible to link up to 13 ÉPIX LINE 10 IP S products from each port of the ÉPIX D4 IP in HI OUTPUT mode.

Signal Connections

The ÉPIX LINE 10 IP S receives a control signal from the ÉPIX D4 IP. The product has 4-pin IP65 XLR in and out ports.

Control Personalities

The ÉPIX LINE 10 IP S uses a 4-pin IP65 XLR data connection for its 7 control personalities: **Test Patterns, Effects Engine, Full Pixel Control, Groups of 5 Pixels, Groups of 10 Pixels, Groups of 25 Pixels, and Groups of 50 Pixels.**

- Refer to the [Operation](#) chapter to learn how to configure the ÉPIX LINE 10 IP S to work in these personalities.
- The [eDMX Channel Assignments and Values](#) section provides detailed information regarding the control personalities.

If the user is not familiar with or need more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#).

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

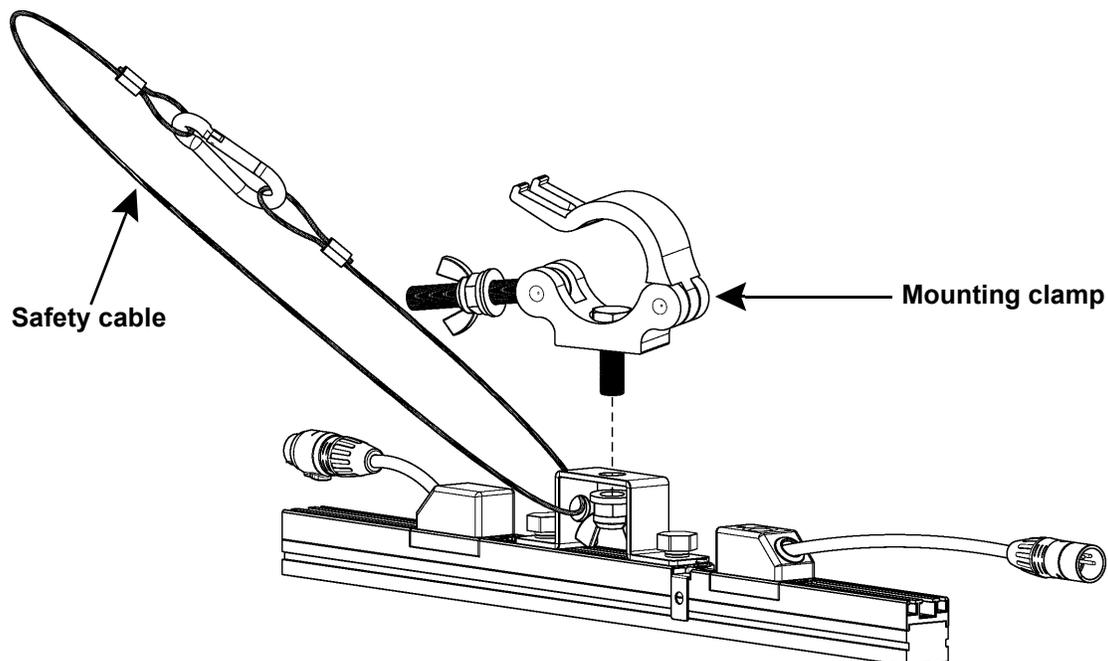

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure and attachment points can support the weight before hanging the product (see the [Technical Specifications](#) for weight information).
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power-linking cables to reach.
- The bracket adjustment knobs allow for horizontal adjustment when moving the product to the desired position. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

Procedure

The ÉPIX LINE 10 IP S comes with an adjustable bracket. The user can directly attach a mounting clamp (sold separately) to this bracket. Make sure the clamp is capable of supporting the weight of this product. For the Chauvet Professional line of mounting clamps, go to <http://www.trusst.com/products>.

Mounting Diagram

Setup

Accessories

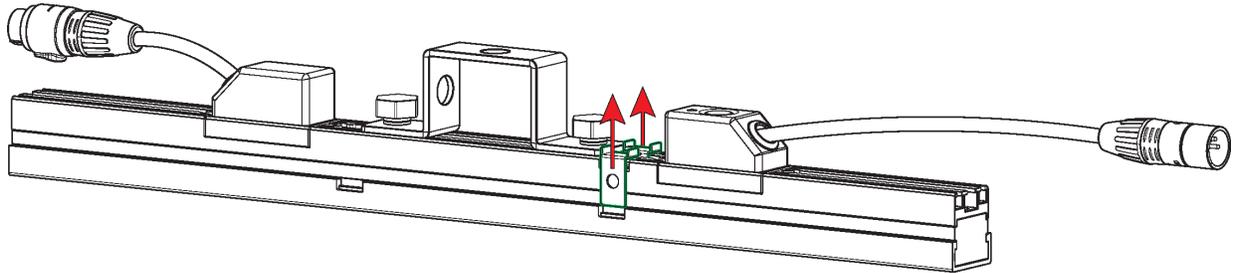

The ÉPIX LINE 10 IP S comes with 3 interchangeable filters and an Interlocking Bracket.

The ÉPIX Mount Spigot Adapter and ÉPIX Mount +/-120° Angling Adapter are available separately.

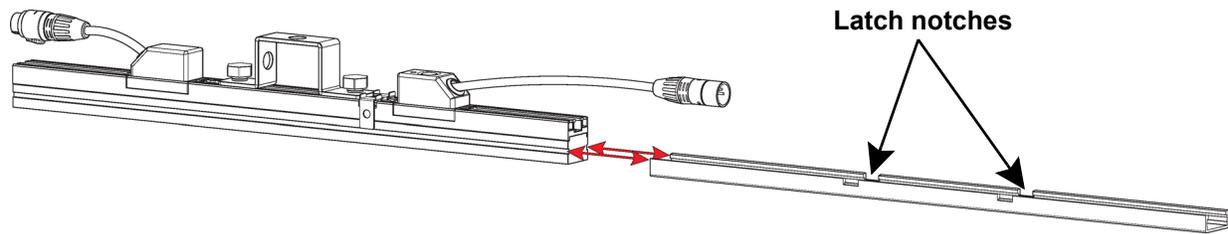

Filters

The 3 included filters are the Milky White Square Filter (comes installed), Milky White Round Filter, and the Black Stealth Square Filter. To uninstall the current filter and replace it with one of the others:

1. Pull the filter latch up until the filter can slide in either direction.

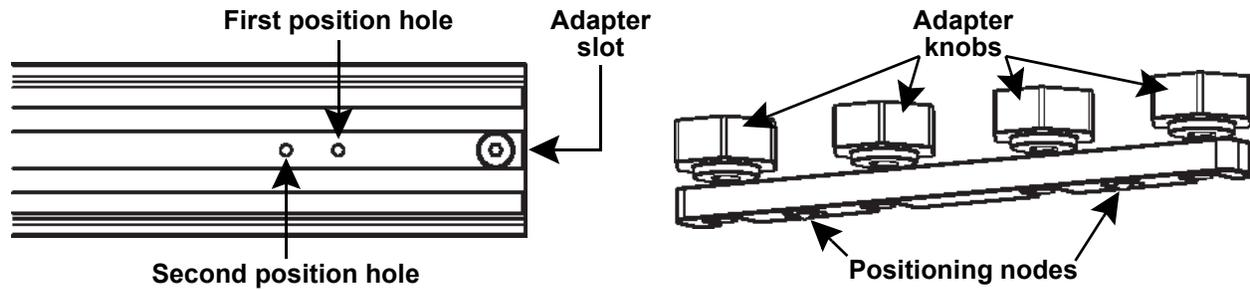

2. Slide the current filter completely off of the ÉPIX LINE 10 IP S.
3. Slide the desired filter completely onto the ÉPIX LINE 10 IP S.

4. Release the filter latch and adjust the filter until the latch is secured in one of the latch notches.

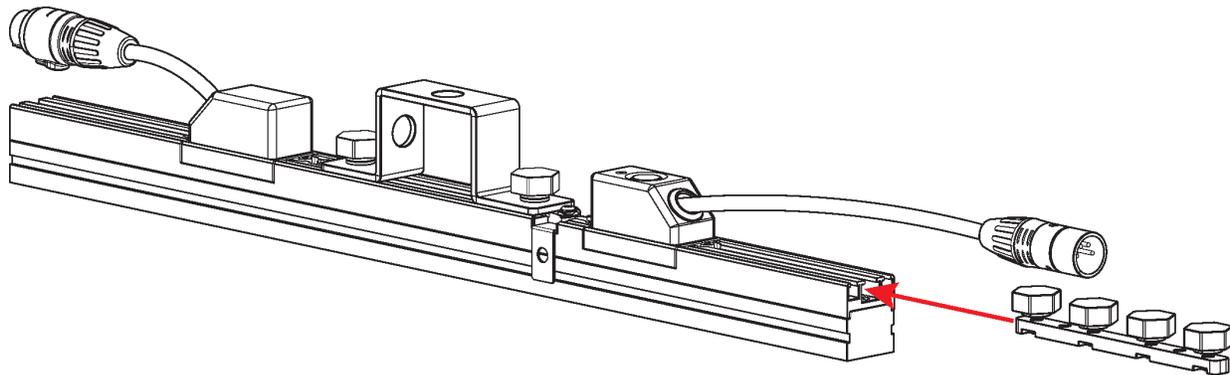

Interlocking Bracket

The included Interlocking Bracket is designed to align ÉPIX LINE 10 IP S products in a straight line.

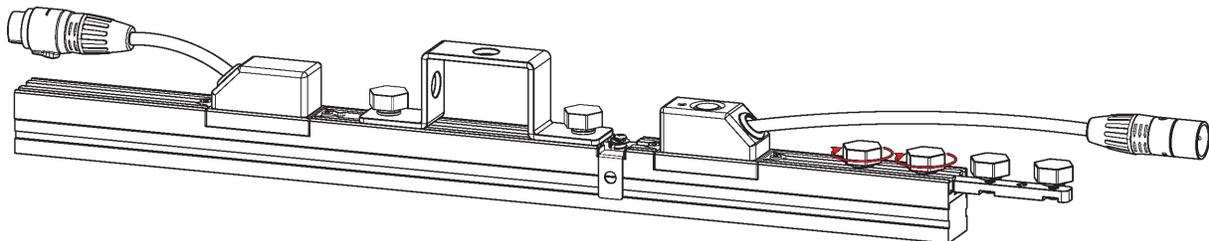

To install the Interlocking Bracket:

1. Slide the Interlocking Bracket into the adapter slot of the first ÉPIX LINE 10 IP S product until the first positioning node lines up with the first position hole.

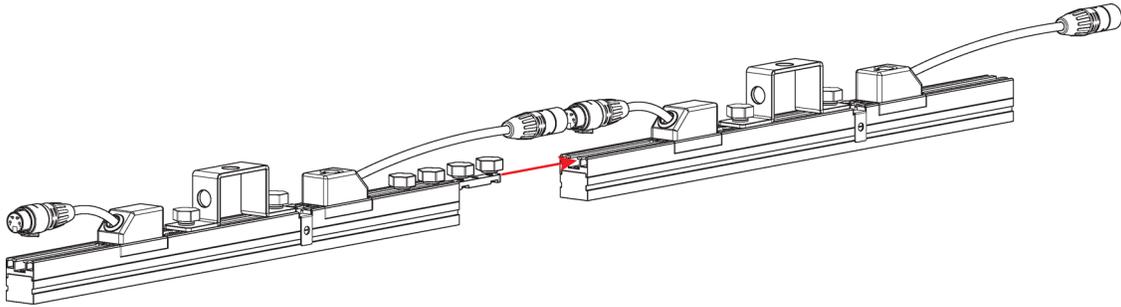

2. Secure the Interlocking Bracket with two of the adapter knobs.

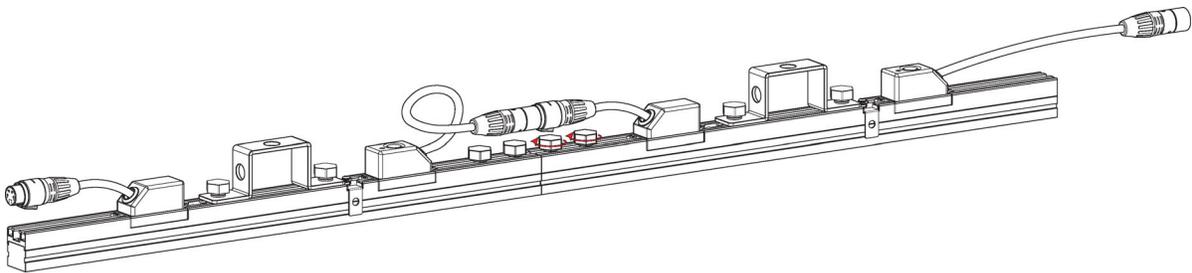

Setup

3. Slide the other end of the Interlocking Bracket into the adapter slot of the second ÉPIX LINE 10 IP S product until the first positioning node lines up with the first position hole.

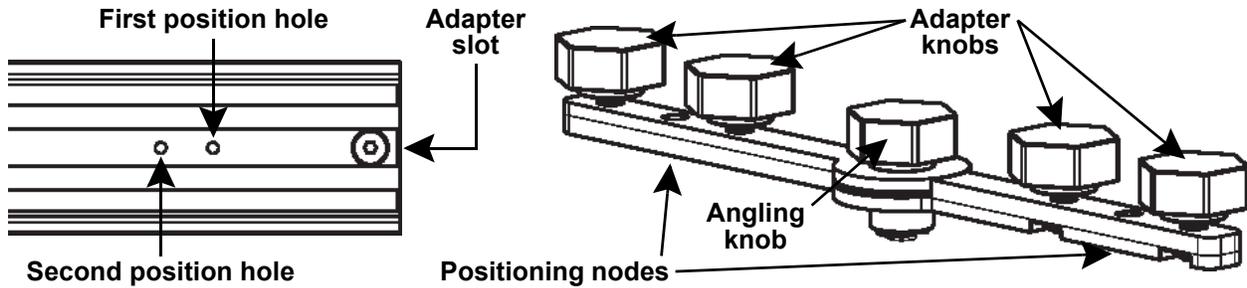

4. Secure the Interlocking Bracket with the two remaining adapter knobs.

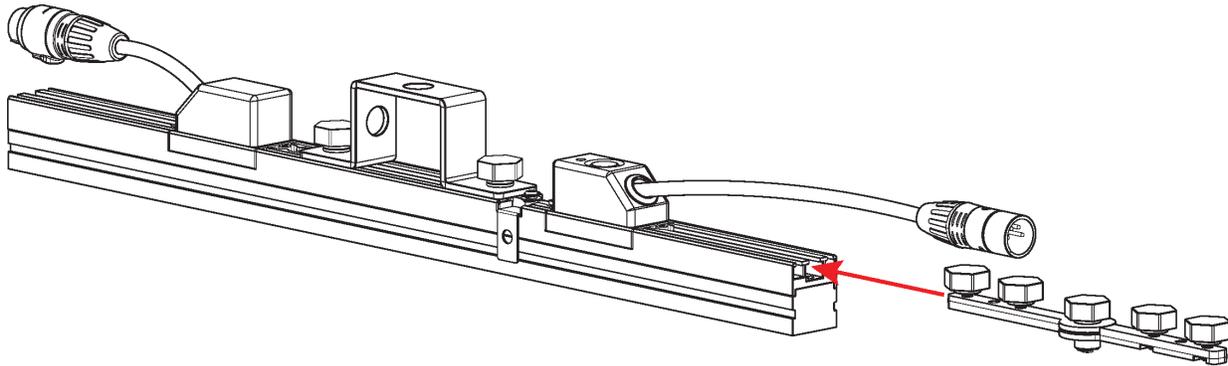

ÉPIX Mount +/-120° Angling Adapter

The ÉPIX Mount +/-120° Angling Adapter is available separately. It interlocks two ÉPIX LINE 10 IP S products and allows for an angle between them anywhere from -120° to +120° (in the first position), or from -90° to +90° (in the second position).

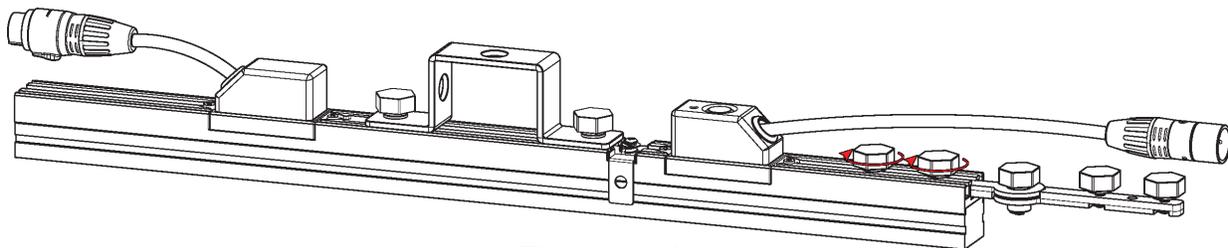

To install the ÉPIX Mount +/-120° Angling Adapter:

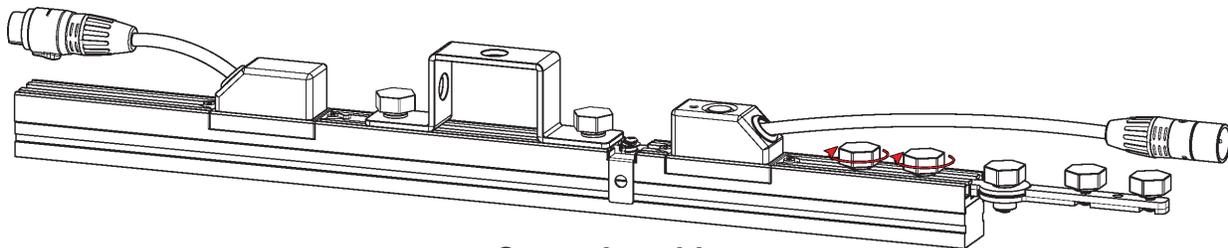

1. Slide the ÉPIX Mount +/-120° Angling Adapter into the adapter slot of the first ÉPIX LINE 10 IP S product until the first positioning node lines up with the first (120°) or second (90°) position hole.

2. Secure the ÉPIX Mount +/-120° Angling Adapter with two of the adapter knobs.

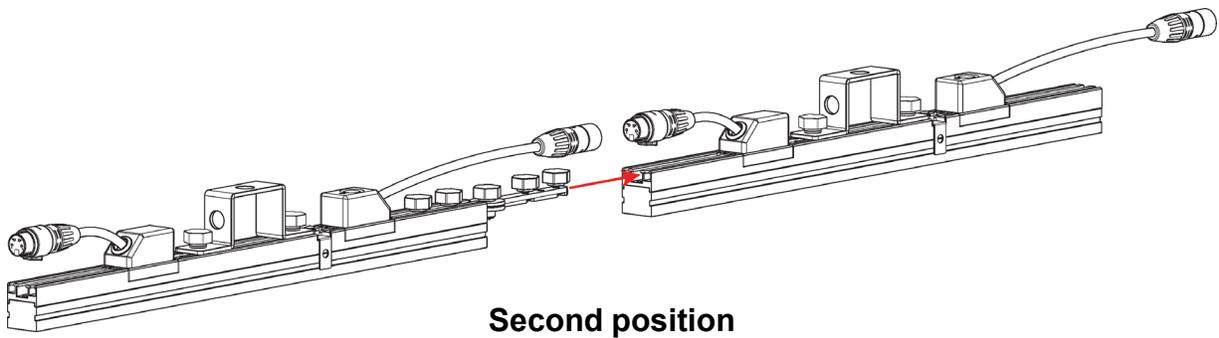

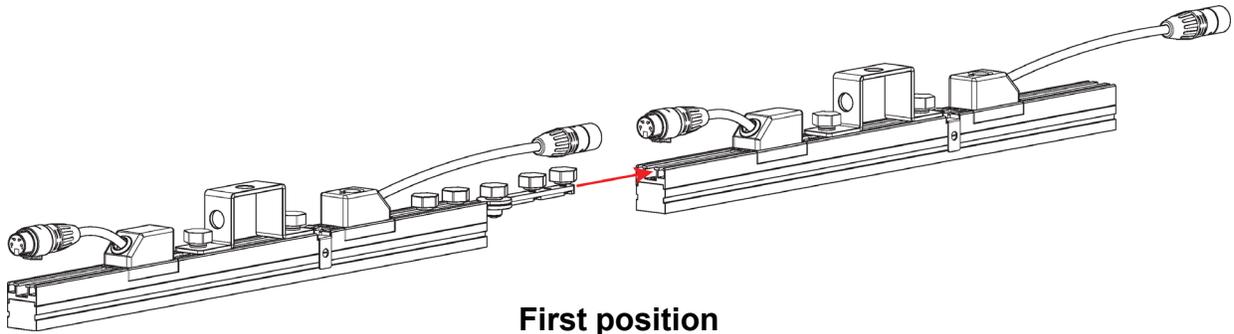

First position

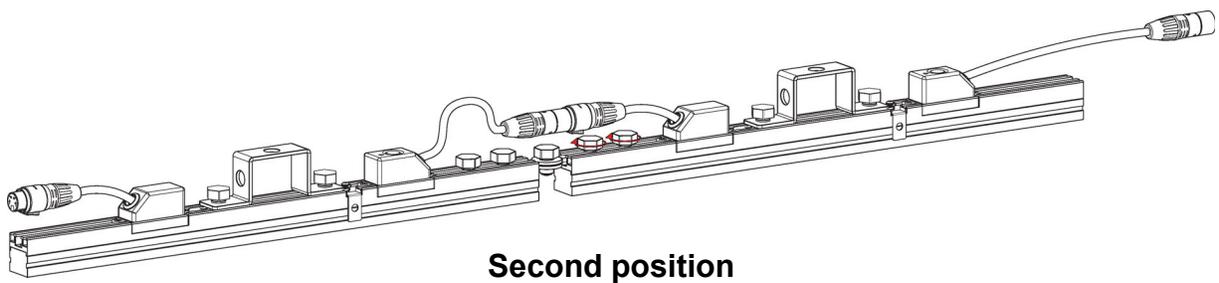

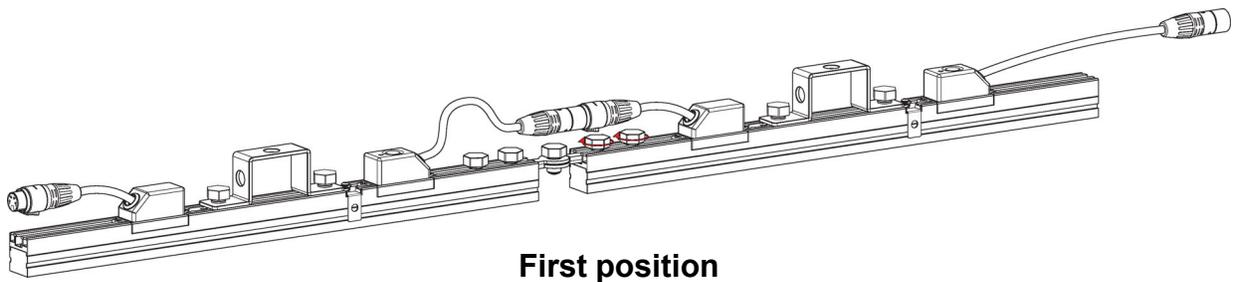

Second position

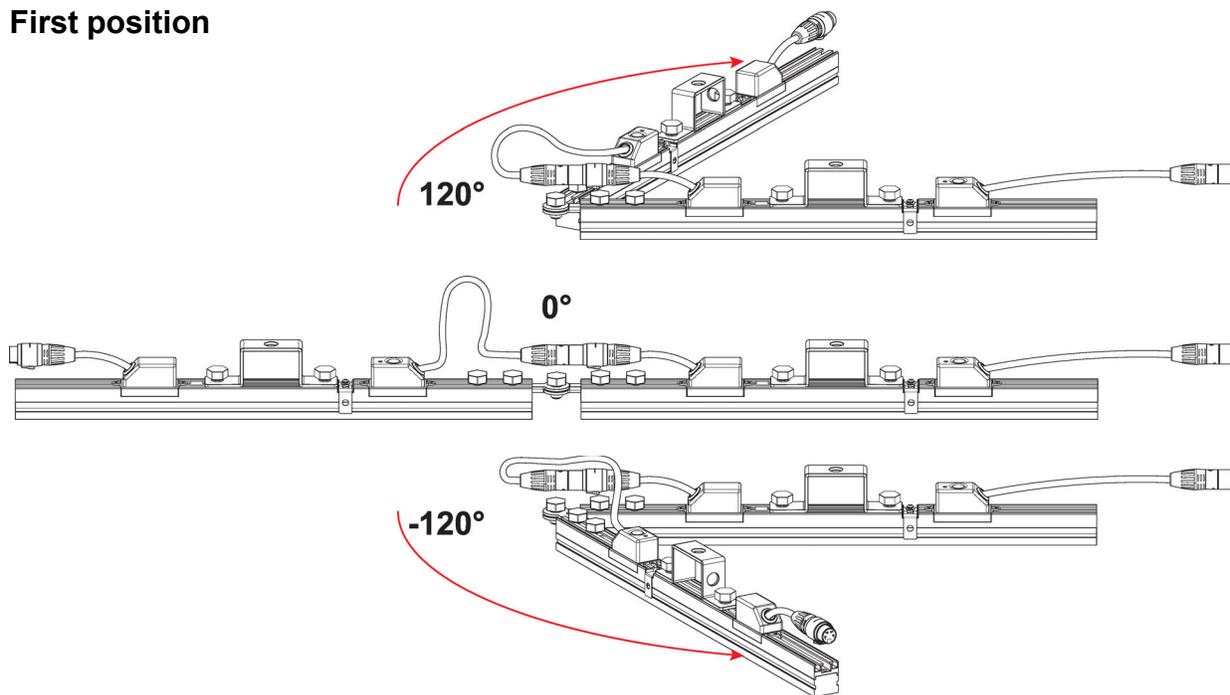

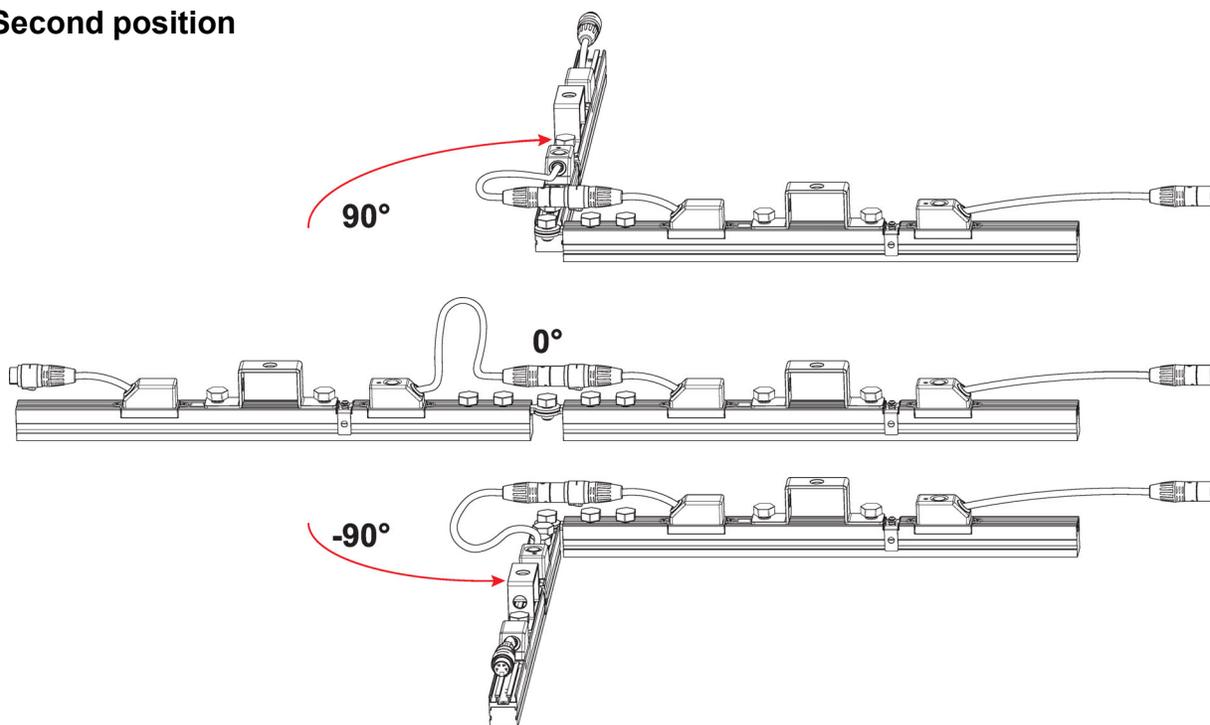

- Slide the other end of the ÉPIX Mount +/-120° Angling Adapter into the adapter slot of the second ÉPIX LINE 10 IP S product until the first positioning node lines up with the first (120°) or second (90°) position hole.

- Secure the ÉPIX Mount +/-120° Angling Adapter with the two remaining adapter knobs.

5. Set the interlocked products at the desired angle, from -120° to $+120^{\circ}$ (in the first position), or from -90° to $+90^{\circ}$ (in the second position).

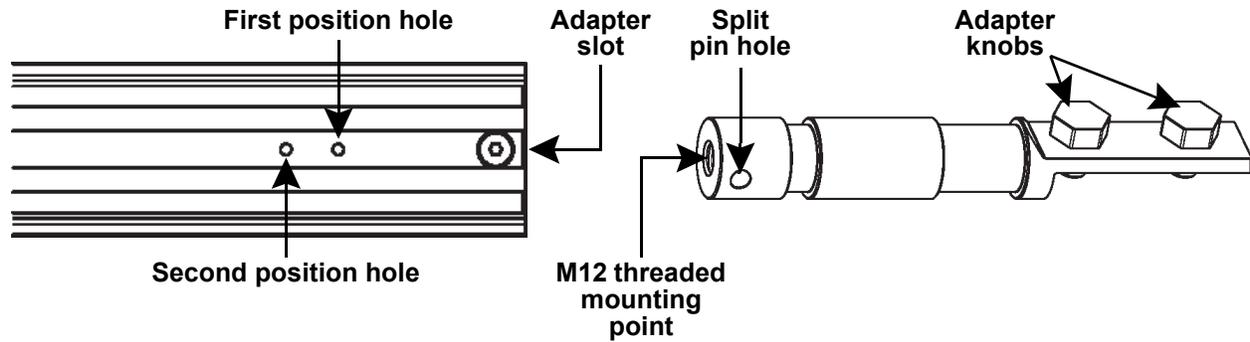

First position**Second position**

6. Tighten the angling knob to secure the adapter at the desired angle.

Setup

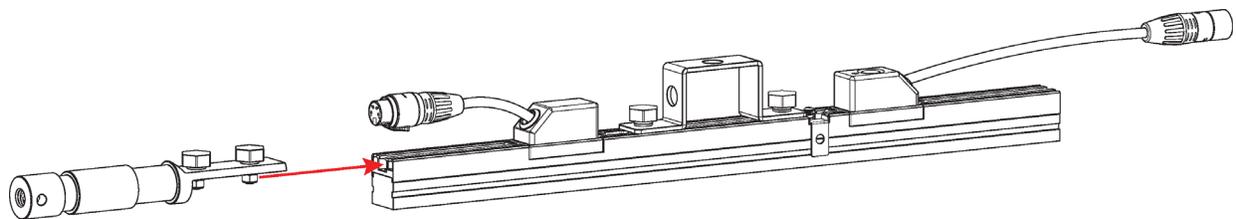

ÉPIX Mount Spigot Adapter

The ÉPIX Mount Spigot Adapter is available separately. It enables mounting the ÉPIX LINE 10 IP S in a dead-hang configuration or with any equipment that is compatible with Jr. pin connectors.

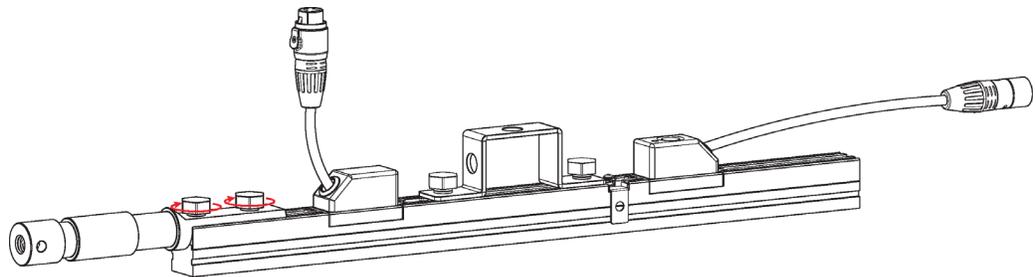

To install the ÉPIX Mount Spigot Adapter:

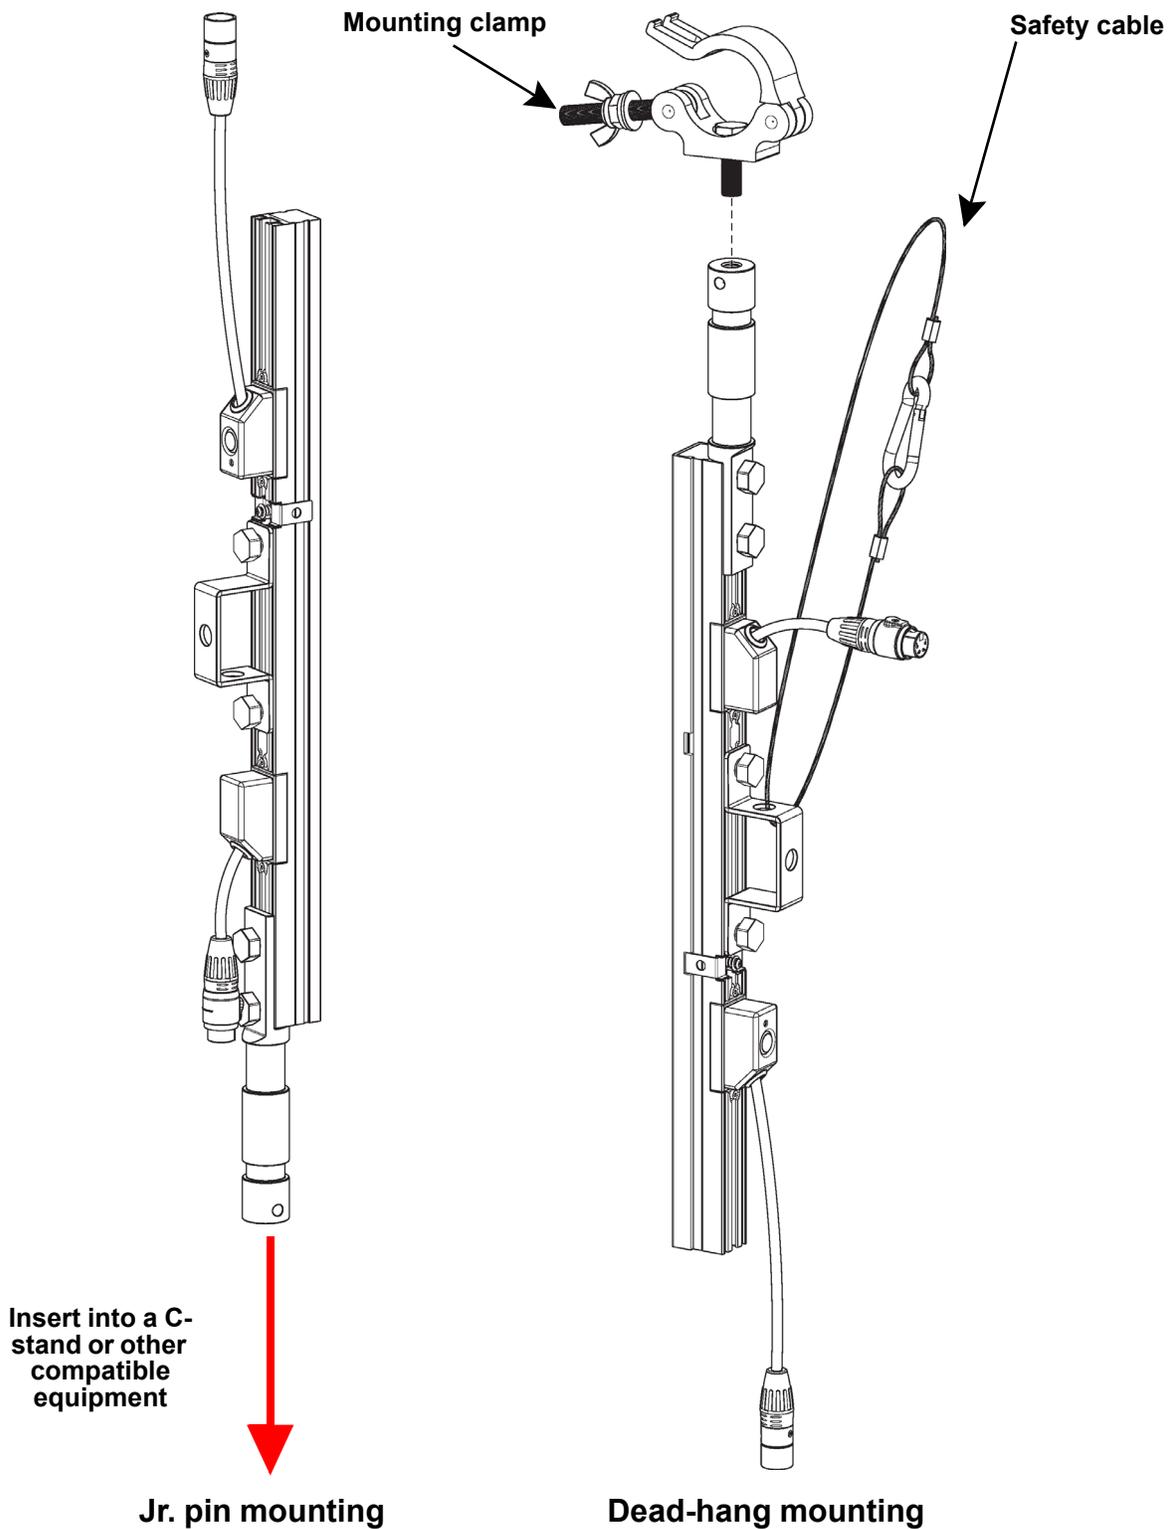

1. Slide the ÉPIX Mount Spigot Adapter into the adapter slot of the ÉPIX LINE 10 IP S as far as it can go.

2. Secure the ÉPIX Mount Spigot Adapter with the adapter knobs.

ÉPIX Mount Spigot Adapter Mounting Diagrams
Single Product

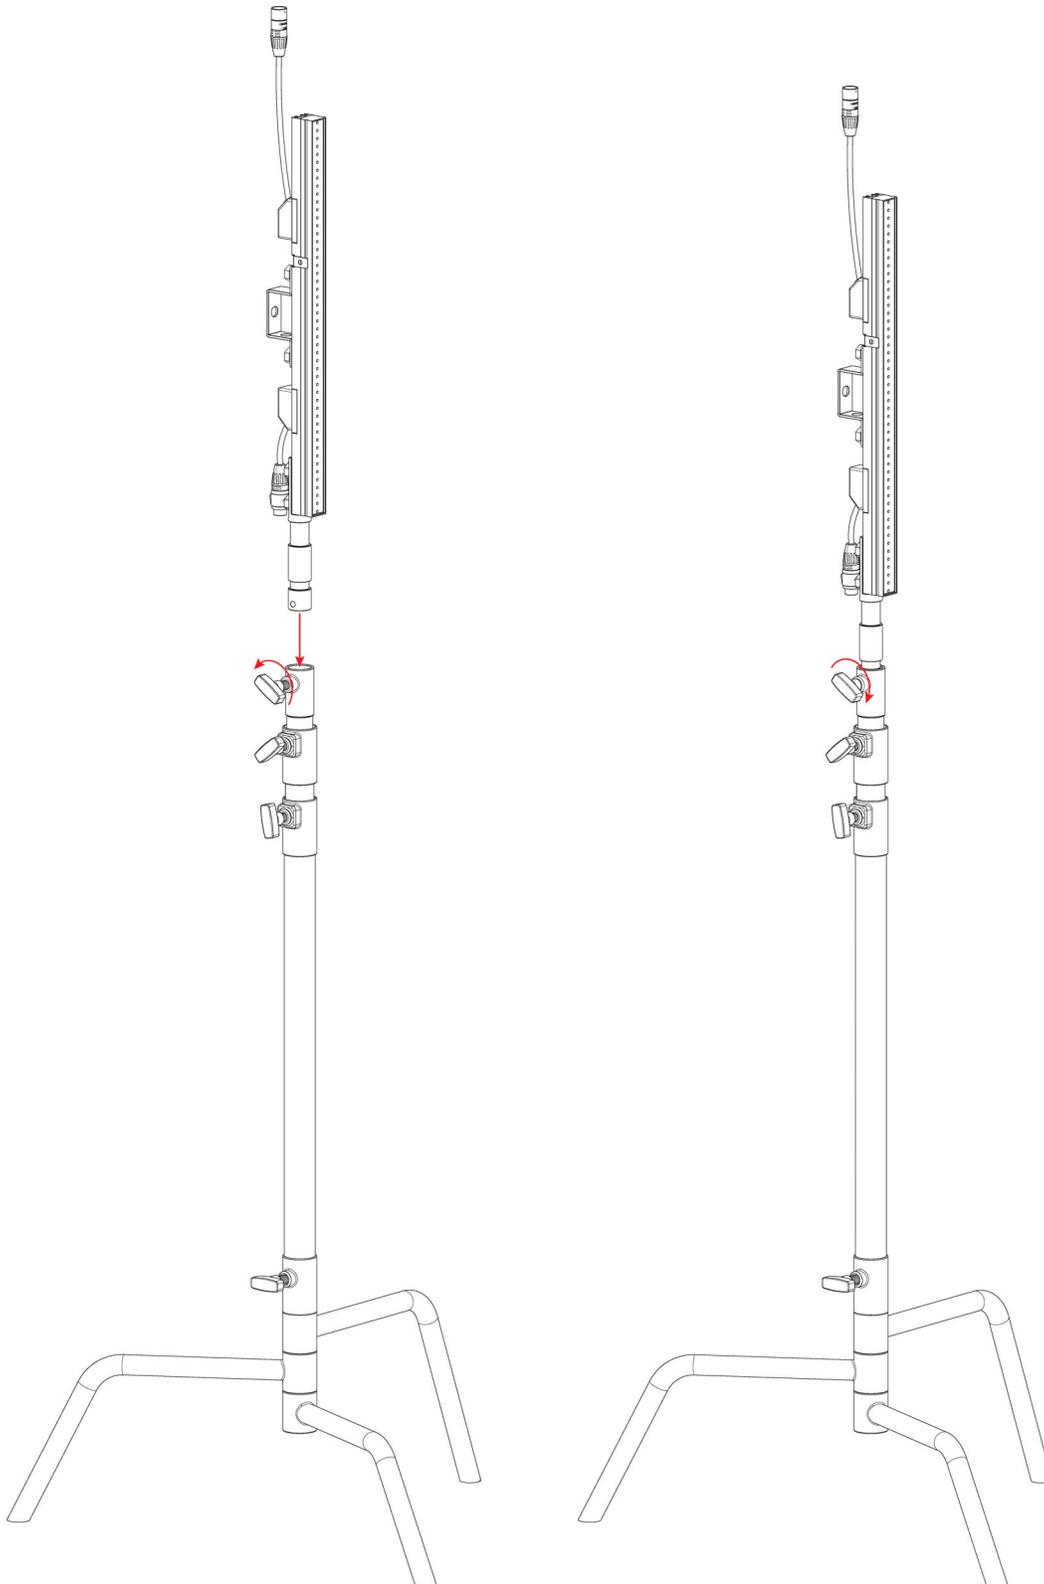

Setup

C-Stand

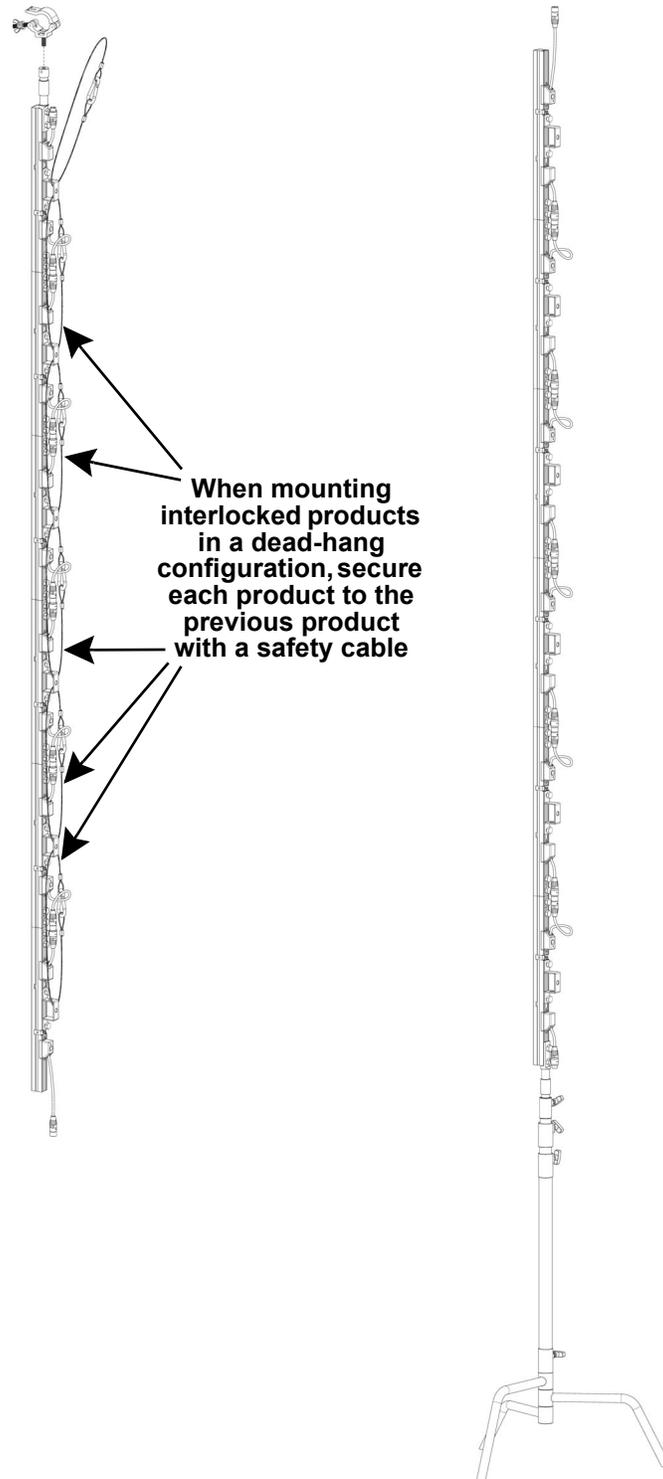

To mount the product in a C-stand using the ÉPIX Mount Spigot Adapter:

1. Insert the spigot into the receptacle of the C-Stand.
2. Secure it by tightening the knob of the C-stand.

Interlocked Products

It is possible to mount up to 3 meters of ÉPIX LINE products (up to 6 ÉPIX LINE 10 IP S products) **vertically** from a single ÉPIX Mount Spigot Adapter in a dead-hang configuration or using a C-stand.

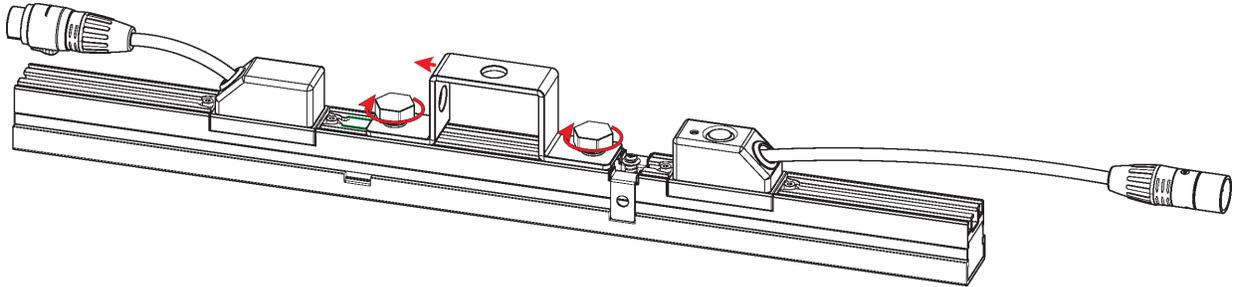

Do NOT mount interlocked products horizontally from a single point. To prevent damage to the products, secure each individual product to the mounting hardware when mounting interlocked products horizontally.

Setup

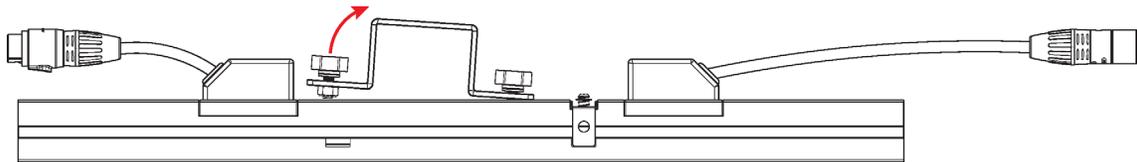

Removing the Mounting Bracket

To remove the mounting bracket from the product:

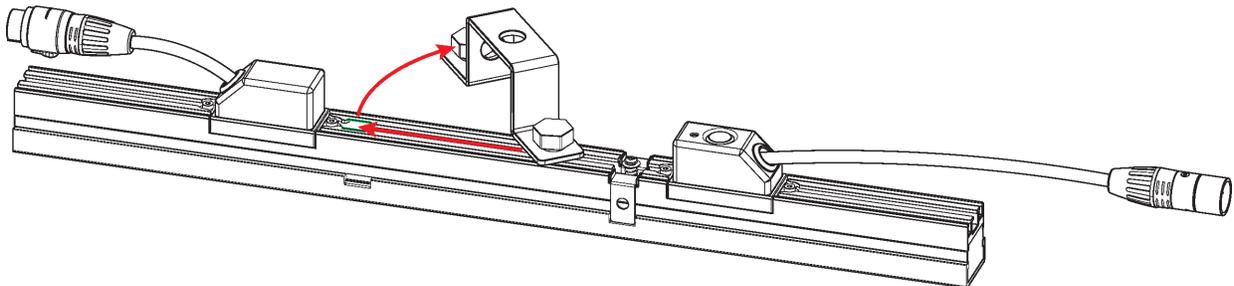

1. Loosen the bracket knobs and slide the bracket until the first knob is positioned over the opening.

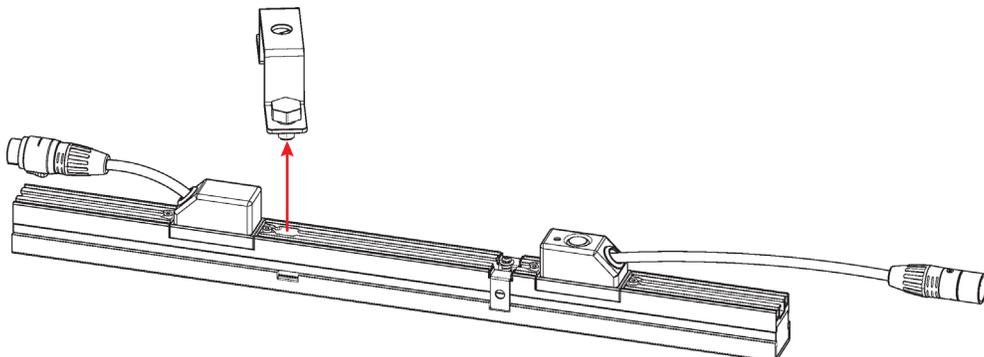

2. Lift the first knob out of the opening.

3. Rotate the bracket to allow it to continue sliding.

4. Lift the second knob out of the opening.

5. Reverse these instructions to re-install the bracket or install a different bracket.

4. Operation

Control Options

Set the ÉPIX LINE 10 IP S starting address in the **001-511** DMX range. This enables control of up to 256 products per universe in the 2-channel **Test Patterns** personality.

Programming

Refer to the ÉPIX D4 IP for all programming of this product.

Menu Map

Refer to the ÉPIX D4 IP product page on www.chauvetprofessional.com for the latest menu map.

Test Button

Use the test button to activate test patterns independently from the ÉPIX D4 IP or an controller.

- Press and hold the test button for 3 seconds to activate test mode.
- Press the test button to cycle through the test patterns:
 - **Dynamic**
 - **Rainbow**
 - **Red**
 - **Green**
 - **Blue**
 - **White**
 - **Full White.**
- Press and hold the test button for 3 seconds again to deactivate test mode.

Signal Control

Use control configurations to operate the product with the ÉPIX D4 IP.

Control Personalities

The ÉPIX LINE 10 IP S has 7 control personalities, set by the ÉPIX D4 IP: **Test Patterns**, **Effects Engine**, **Full Pixel Control**, **Groups of 5 Pixels**, **Groups of 10 Pixels**, **Groups of 25 Pixels**, and **Groups of 50 Pixels**

- See the [Starting Address](#) section for the highest recommended address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

Each product and control mode will respond to a unique starting address from the controller and ÉPIX D4 IP. All products with the same starting address will respond in unison.

Personality	Channels	Products per Universe*	Highest Address*
Test Patterns	2	256	511
Effects Engine	18	28	495
Full Pixel Control	150	3	363
Groups of 5 Pixels	30	17	483
Groups of 10 Pixels	15	34	498
Groups of 25 Pixels	6	85	507
Groups of 50 Pixels	3	170	510

*Products per Universe and Highest Address values assume the **Dense Mapping** function is disabled. See the User Manual for the ÉPIX D4 IP for more information.

5. Maintenance

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean each lighting product at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Technical Specifications
